Chapters are written to be accessible and easy to understand by all levels of engineers and technicians. A wide range of related topics that engineers and technical managers need to understand are covered including broadcast documentation, FCC practices, technical standards, security, safety, disaster planning, facility planning, project management and engineering management.

This at a time when issues of transnational media, the credibility of news and the perils of disinformation and information warfare figure worryingly in public discourse. Reflecting the perspective of middle power Australia, author Geoff Heriot locates the strategic utility of multiplatform international broadcasting with reference to contemporary theories of soft, hard, smart power, projection and intercultural communication.

He applies a fresh model of strategic analysis to the political history of Radio Australia examining the various external and internal variables that resulted in its flawed success in political communication during the late Cold War period **World Radio TV Handbook, WRTH 2017** ,2016 **World Radio TV Handbook, WRTH 2018** ,2017
