A Leader's Destiny Elias Aboujaoude, 2024-05-21 A psychiatrist puts leadership on the couch with a provocative exploration of its crucial often ignored psychological and personal character foundations Elias Aboujaoude's distinctive exploration of leadership explains how our cultlike obsession with leadership gives narcissists and sociopaths an edge and results in leadership failure everywhere we look and how resisting the imperative to rise at all costs leaves many with an inferiority complex His takedown of the leadership industrial complex pokes a very sharp elbow into an industry seemingly united in a modern form of alchemy to create leadership gold a waste of time and money Aboujaoude vividly illustrates since leaders emerge from a unique combination of personal psychological and situational factors that cannot be easily controlled or manipulated no matter how gifted the executive coach This bracing take on a classic subject provides new insight into the way psychology aligns with the requirements of effective and happy leadership The result is to empower us to understand ourselves and step up if we have what it takes to lead or find equally rewarding often superior ways to achieve fulfillment if we don't

50 years after the perceptron, 25 years after PDP: Neural computation in language sciences Julien Mayor, Pablo Gomez, Franklin Chang, Gary Lupyan, 2014-08-11 This Research Topic aims to showcase the state of the art in language research while celebrating the 25th anniversary of the tremendously influential work of the PDP group and the 50th anniversary of the perceptron Although PDP models are often the gold standard to which new models are compared the scope of this Research Topic is not constrained to connectionist models Instead we aimed to create a landmark forum in

which experts in the field define the state of the art and future directions of the psychological processes underlying language learning and use broadly defined We thus called for papers involving computational modeling and original research as well as technical philosophical or historical discussions pertaining to models of cognition We especially encouraged submissions aimed at contrasting different computational frameworks and their relationship to imaging and behavioral data Social Security Works! Nancy Altman, Eric Kingson, 2015-01-21 A growing chorus of prominent voices in Congress and elsewhere are calling for the expansion of our Social Security system people who know that Social Security will not go broke and does not add a penny to the national debt Social Security Works will amplify these voices and offer a powerful antidote to the three decade long billionaire funded campaign to make us believe that this vital institution is destined to collapse It isn't From the Silent Generation to Baby Boomers from Generation X to Millennials and Generation Z we all have a stake in understanding the real story about Social Security Critical to addressing the looming retirement crisis that will affect two thirds of today's workers Social Security is a powerful program that can help stop the collapse of the middle class lessen the pressure squeezing families from all directions and help end the upward redistribution of wealth that has resulted in perilous levels of inequality All Americans deserve to have dignified retirement years as well as an umbrella to protect them and their families in the event of disability or premature death Sure to be a game changer Social Security Works cogently presents the issues and sets forth both an agenda and a political strategy that will benefit us all At stake are our values and the kind of country we want for ourselves and for those that follow **The Northeast Question** Pradip Phanjoubam, 2015-12-14 This book explores the idea psychology and political geography of Northeast India as forged by two interrelated but autonomous meta narratives First the politics of conflict inherent in and therefore predetermined by physical geography and second the larger geopolitics that was unfolding during the colonial period Unravelling the history behind the turmoil engulfing Northeast India the study contends that certain geographies most pertinently fertile river valleys and surrounding mountains which feed the rivers are integral to nature and any effort to disrupt this cohesion will result in conflict It comprehensively traces the geopolitics of the region since colonial era in particular the Great Game the politics that went into the making of the McMahon Line the Radcliffe Line and the Pemberton Line the region's relations with its international neighbours China Bhutan Myanmar Bangladesh and Nepal as well as the issue of many formerly non state bearing populations awakening to the reality of the modern state Lucid and analytical this book will be of great interest to scholars and researchers of Northeast India modern Indian history international relations defence and strategic studies and political science

Evolution of International Aviation Dawna L. Rhoades, 2016-04-15 The purpose of this book is twofold First it lays out the forces that shaped the international aviation industry and that changed all the rules in the drive for liberalization Second it looks at the many interesting and difficult choices ahead that the airline industry in general and the international aviation industry in particular face These choices include many dichotomies pulling back from the trend toward liberalization or

embracing the liberalization trend merging in search of profitability or fragmenting the industry in search of economies. These possible futures are explored including the pros and cons of each future from a national consumer, employer, and employee perspective. As with the previous two editions, *Evolution of International Aviation* reviews the historical development of the international aviation system. From this foundation, it then provides an updated and expanded account of the current state of the aviation and aerospace industry, including profitability, consolidation, and merger activity. New to this edition, the book broadens the coverage of the industry segments: airlines, air cargo, and manufacturing, to include the emerging commercial space sector. It also emphasizes the relationship between aviation and the political process, exploring the sustainability of this mode of transportation in a world of climate change, high oil prices, and political instability. Because this book is intended for both the interested amateur and the more serious student, references are provided in the text and at the end of each chapter to allow for further in-depth study. The third edition also adds to each chapter a set of learning objectives and a concluding series of questions for discussion.
