Where We Lived Discovering The Places We Once Called Home:

Where We Lived Jack Larkin, 2006 A social history of early America combines with more than four hundred photographs and drawings to look at everyday life and the many different kinds of dwellings at the dawn of the new republic from the American Revolution to the Industrial Revolution At Home in Nineteenth-Century America Amy G. Richter, 2015-01-23 Few institutions were as central to nineteenth century American culture as the home Emerging in the 1820s as a sentimental space apart from the public world of commerce and politics the Victorian home transcended its initial association with the private lives of the white native born bourgeoisie to cross lines of race ethnicity class and region Throughout the nineteenth century home was celebrated as a moral force domesticity moved freely into the worlds of politics and reform and home and marketplace repeatedly remade each other At Home in Nineteenth Century America draws upon advice manuals architectural designs personal accounts popular fiction advertising images and reform literature to revisit the variety of places Americans called home Entering into middle class suburban houses slave cabins working class tenements frontier dugouts urban settlement houses it explores the shifting interpretations and experiences of these spaces from within and without Nineteenth century homes and notions of domesticity seem simultaneously distant and familiar This sense of surprise and recognition is ideal for the study of history preparing us to view the past with curiosity and empathy inspiring comparisons to the spaces we inhabit today malls movie theaters city streets and college campuses Permitting us to listen closely to the nineteenth century's sweeping conversation about home in its various guises At Home in Nineteenth Century America encourages us to hear our contemporary conversation about the significance and meaning of home anew while appreciating the lingering imprint of past ideals Instructor's Guide Stone Houses of Jefferson County Maureen Hubbard Barros, Brian W. Gorman, Robert A. Uhlig, 2015-05-11 Jefferson County New York has one of the richest concentrations of stone houses in America As many as 500 stone houses churches and commercial buildings were built there before 1860 Some of the buildings are beautiful mansions built by early entrepreneurs others are small vernacular farmhouses Some are clustered together others dot the countryside near stone outcroppings Embedded in the fabric of each building are the stories of its location its maker and its inhabitants over time Lavishly illustrated with almost 300 photographs this volume highlights eighty five stone houses in the region The editors explore both the beauty and permanence of the stonework and the courage and ambition of the early dwellers They detail the ways in which skilled masons utilized local limestone and sandstone crafting double faced stone walls to protect against fire and harsh winters The book includes discussions of the geology of the region the stone buildings that have been lost and the preservation and care of existing structures Stone Houses of Jefferson County provides a fascinating look at the intrinsic beauty of these buildings and the historical links they provide to our early settlement **The Oxford Encyclopedia of American Social History** Lynn Dumenil, 2012-06-07 The Oxford Encyclopedia of American Social History is the first reference work to eschew a narrow focus on past presidents

intellectuals military heroes and other exhaustively studied and well remembered persons and instead examine the history of ordinary Americans The more than 450 entries in the Encyclopedia examine our shared history from the bottom up with entries on the way automobiles shaped American lives the westward movement of settlers and farmers in the eighteenth and nineteenth centuries the transformation of work over time the women s suffrage movement counterculture leisure activities consumption patterns voting habits population movements racial divides and many more fascinating topics intended to help readers develop a richer framework for understanding the social experience of Americans throughout history *Historic Real Estate* Whitney Martinko,2020-05-15 A detailed study of early historical preservation efforts between the 1780s and the 1850s In *Historic Real Estate* Whitney Martinko shows how Americans in the fledgling United States pointed to evidence of the past in the world around them and debated whether and how to preserve historic structures as permanent features of the new nation s landscape From Indigenous mounds in the Ohio Valley to Independence Hall in Philadelphia from Benjamin Franklin s childhood home in Boston to St Philip s Episcopal Church in Charleston South Carolina from Dutch colonial manors of the Hudson Valley to Henry Clay s Kentucky estate early advocates of preservation strove not only to place boundaries on competitive real estate markets but also to determine what should not be for sale how consumers should behave and how certain types of labor should be valued Before historic preservation existed as we know it today many Americans articulated eclectic and sometimes contradictory definitions of architectural preservation to work out practical strategies for defining the relationship between public good and private profit In arguing for the preservation of houses of worship and Indigenous earthworks for example some invoked the public interest of their stewards to strengthen corporate control of these collective spaces Meanwhile businessmen and political partisans adopted preservation of commercial sites to create opportunities for and limits on individual profit in a growing marketplace of goods And owners of old houses and ancestral estates developed methods of preservation to reconcile competing demands for the seclusion of and access to American homes to shape the ways that capitalism affected family economies In these ways individuals harnessed preservation to garner political economic and social profit from the performance of public service Ultimately Martinko argues by portraying the problems of the real estate market as social rather than economic advocates of preservation affirmed a capitalist system of land development by promising to make it moral **Mastering Iron** Anne Kelly Knowles,2013-01-15 Veins of iron run deep in the history of America Iron making began almost as soon as European settlement with the establishment of the first ironworks in colonial Massachusetts Yet it was Great Britain that became the Atlantic world s dominant low cost high volume producer of iron a position it retained throughout the nineteenth century It was not until after the Civil War that American iron producers began to match the scale and efficiency of the British iron industry In *Mastering Iron* Anne Kelly Knowles argues that the prolonged development of the US iron industry was largely due to geographical problems the British did not face Pairing exhaustive manuscript research with analysis of a detailed geospatial database that

she built of the industry Knowles reconstructs the American iron industry in unprecedented depth from locating hundreds of iron companies in their social and environmental contexts to explaining workplace culture and social relations between workers and managers She demonstrates how ironworks in Alabama Maryland Pennsylvania and Virginia struggled to replicate British technologies but in the attempt brought about changes in the American industry that set the stage for the subsequent age of steel Richly illustrated with dozens of original maps and period art work all in full color Mastering Iron sheds new light on American ambitions and highlights the challenges a young nation faced as it grappled with its geographic conditions
