Relocating Global Cities M Mark Amen, M Martin Bosman, Kevin Archer, 2006-04-27 Drawing on eight case studies from key cities on the periphery of global cities literature *Relocating Global Cities* argues that all cities are globalizing in important ways Case studies of Frankfurt Johannesburg Bangkok Manila Tampa Sydney Brussels and Caracas provide the basis for an alternative theoretical approach to global city formation Reconciling a market based understanding and an agency based understanding of global cities this book proposes that globalization and cities are mutually constituted by the global political economy

engaging with transnational and local agents The volume proposes an alternate theoretical approach to the literature of globalization while remaining grounded in concrete discussions of key cities Its expert contributors reconcile the conflicting ways in which two dominant paradigms one emphasizing market forces and the other the unique actions of individuals and groups embody our understanding of global cities This book will be of interest to students and researchers alike and is a perfect complement to texts in Urban Studies and Globalization Gender, Work, and Economy Heidi Gottfried, 2013-11-15 This engaging new text uses a feminist lens to crack open the often hidden worlds of gender and work addressing enduring questions about how structural inequalities are produced and why they persist Making visible the social relationships that drive the global economy the book explores how economic transformations not only change the way we work but how we live our lives The full extent of changing patterns of employment and the current financial crisis cannot be fully understood in the confines of narrow conceptions of work and economy Feminists address this shortcoming by developing both a theory and a political movement aimed at unveiling the power relations inherent in old and new forms of work By providing an analysis of gender work and the economy Heidi Gottfried brings to light the many faces of power from the bedroom to the boardroom A discussion of globalization is threaded throughout the book to uncover the impact of increasing global interconnections and vivid case studies are included from industrialized countries such as the US and the global cities of New York London and Tokyo as well as from developing countries and the emerging global cities of Beijing Shanghai and Dubai This comprehensive analysis of gender and work in a global economy incorporating sociology geography and political economy perspectives will be a valued companion to students in gender studies and across the social sciences more generally The Political Economy of City Branding Ari-Veikko Anttiroiko, 2014-02-24 Globalization affects urban communities in many ways One of its manifestations is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship information expertise and consumption This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets the latter including a naturally evolving reputation or consciously developed competitive identity or brand The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post industrial cities in North America Europe East Asia and Australasia Special attention is given to local economic development policy and industrial profiling and global city rankings are used to provide empirical evidence for cities characteristics and positions in the global urban hierarchy On top of this social and urban challenges such as creative class struggle are also discussed The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results This book will be of interest to scholars and practitioners working in the areas of local economic development urban planning public management and branding Megacities Dirk Kruijt, Kees Koonings, 2013-04-04 For the first time in history the

majority of the world's population lives in cities the result of a rapid process of urbanization that started in the second half of the twentieth century Megacities around the world are rapidly becoming the scene for deprivation especially in the global South and the urban excluded face the brunt of what in many cases seems like low intensity warfare Featuring case studies from across the globe including Latin America the Middle East and Africa Megacities examines recent worldwide trends in poverty and social exclusion urban violence and politics and links these to the challenges faced by policy makers and practitioners

Frontiers of Globalization Research: Ino Rossi, 2007-03-21 To bring this volume together the editor asked leading scholars in the field of globalization to outline a research framework that reflects their own approach to the subject The resulting book presents a broad spectrum of analytical approaches to globalization Theoretical reviews are complemented by substantive chapters and methodological analyses Contributors include scholars in the fields of sociology anthropology history and political science These writings have been organized into four sections theoretical perspectives and cultural globalization economic globalization political globalization and methodological approaches

China and Europe Klaus Kunzmann, Willy A Schmid, Martina Koll-Schretzenmayr, 2009-09-10 China and Europe address the challenges for the cities and regions of Europe that may be the consequences of such development trends Contributions by policy makers and academic observers will prepare the ground for debating the dimensions economy knowledge and culture environment and mobility quality of life and governance of this challenge

Re-Envisioning Global Development Sandra Halperin, 2013-04-17 Re Envisioning Global Development offers an original conceptualisation of capitalist development from its origins to the present day Most approaches to understanding contemporary development assume that industrial capitalism was achieved through a process of nationally organised economic growth and that in recent years its organisation has become increasingly trans local or global However Halperin shows that nationally organised economic growth has rarely been the case it has only recently come to characterise a few countries and for only a few decades This innovative text elaborates an alternative ontology and way of thinking about global development during the last two centuries one linked not to nations and regions but to a set of essentially trans national relations and connections It argues that capitalist development has everywhere and from the start involved not whole nations or societies but only sectors or geographical areas within states By bringing this aspect of historically normal capitalist development into clearer focus the book clarifies the specific conditions and circumstances that enabled European economies to pursue a more broad based development following World War II and what prevented a similar outcome in the contemporary third world It also clarifies the nature spatial extent and circumstances of current globalising trends Wide ranging and provocative this book is required reading for advanced level students and scholars in development studies development economics and political science

The SAGE Companion to the City Tim Hall, Phil Hubbard, John Rennie Short, 2008-05-21 This book pulls together an exceptional range of literature in addressing the complexity of contemporary patterns and processes of urbanization It offers a rich array of

concepts and theories and is studded with fascinating examples that illustrate the changing nature of cities and urban life Paul Knox Virginia Tech University The SAGE Companion to the City is a tour de force of contemporary urban studies At once a stocktake showcase and springboard for scholarly approaches to cities and city life the editors have assembled a cohesive and convincing set of lucid insightful and critical essays of great quality Eschewing grand theory and deadening encyclopediasm the contributors refresh both longstanding concerns and explore new themes in ways both brilliantly accessible to newcomers and satisfying to the cognoscenti Robert Freestone University of New South Wales Organized in four sections The SAGE Companion to the City provides a systematic A Z to understanding the city that explains the interrelations between society culture and economy Histories explores power religion science and technology modernity and the landscape of the city Economies and Inequalities explores work and leisure globalisation innovation and the role of the state Communities explores migration and settlement segregation and division civility housing and homelessness Order and Disorder explores politics and policy planning and conflict law and order surveillance and terror An accessible guide to all areas of urban studies the text offers both a contemporary cutting edge reflection and measured historical and geographical reflection on urban studies It will be essential reading for students of any discipline interested in the city as an object of study
