World Trade Law after Neoliberalism Andrew Lang,2013-01-17 The rise of economic liberalism in the latter stages of the 20th century coincided with a fundamental transformation of international economic governance especially through the law of the World Trade Organization In this book Andrew Lang provides a new account of this transformation and considers its enduring implications for international law Against the commonly held idea that neoliberal policy prescriptions were encoded into WTO law Lang argues that the last decades of the 20th century saw a reinvention of the international trade regime and a reconstitution of its internal structures of knowledge In addition the book explores the way that resistance to economic liberalism was expressed and articulated over the same period in other areas of international law most prominently international human rights law It considers the promise and limitations of this form of inter regime contestation arguing that measures to ensure greater collaboration and cooperation between regimes may fail in their objectives if they are not accompanied by a simultaneous destabilization of each regime s structures of knowledge and characteristic features With that in mind the book contributes to a full and productive contestation of the nature and purpose of global economic governance

Multilateralism and the World Trade Organisation Rorden Wilkinson,2006-04-10 This book explores the significance of the establishment of the World Trade Organisation WTO as well as some of the issues brought into sharper focus by the Seattle demonstrations of 1999 Located within the broader study of global governance Multilateralism and the World Trade Organisation offers a critical examination of the legal framework of the WTO The book uncovers a series of discriminatory practices embedded in the WTO s legal framework which act to the disadvantage of smaller developing and transitional states *The Human Rights Impact of the World Trade Organisation* James Harrison,2007-07-31 This book

examines the impact of international trade rules on the promotion and protection of human rights and explains why human rights are an important mechanism for assessing the social justice impact of the international trading system. The core of the book is an in depth analysis of the various ways in which international trade law rules impact upon human rights protection and promotion emphasising the significance of the jurisdictional context in which the human rights issues arise. Coercive measures that are taken by one country to protect and promote human rights in another country are distinguished from measures taken by a country to protect and promote the human rights of its own population. The author contends that international trade law rules have utilised certain ad hoc mechanisms to deal with particularly pressing human rights concerns in the trade context but also argues that these mechanisms do not provide systemic solutions to the inter linkages between the two legal systems. The author therefore examines mechanisms by which human rights arguments could be more systematically raised and adjudicated upon in WTO dispute settlement proceedings highlighting future opportunities and difficulties. He concludes by considering broader systemic issues outside the dispute settlement process that need to be addressed if trade law rules are to successfully protect and promote human rights.
