Case Studies in Control Stanko Strmčnik, Dani Juričić, 2013-06-12 Case Studies in Control presents a framework to facilitate the use of advanced control concepts in real systems based on two decades of research and over 150 successful applications for industrial end users from various backgrounds In successive parts the text approaches the problem of putting the theory to work from both ends theoretical and practical The first part begins with a stress on solid control theory and the shaping of that theory to solve particular instances of practical problems It emphasizes the need to establish by experiment whether a model derived solution will perform properly in reality The second part focuses on real industrial applications based on the needs and requirements of end users Here the engineering approach is dominant but with theoretical input of varying degree depending on the particular process involved Following the illustrations of the progress that can be made from either extreme of the well known theory practice divide the text proceeds to a third part related to the development of tools that enable simpler use of advanced methods a need only partially met by available commercial products Each case study represents a self contained unit that shows an experimental application of a particular method a practical solution to an industrial problem or a toolkit that makes control design and implementation easier or more efficient Among the applications presented are wastewater treatment manufacturing of electrical motors temperature control of blow moulding burn protective garments quality assessment and rapid prototyping Written by contributors with a considerable record of industrially applied research Case Studies in Control will encourage interaction between industrial practitioners and academic researchers and be of benefit to

both helping to make theory realistic and practical implementation more thorough and efficacious Advances in Industrial Control aims to report and encourage the transfer of technology in control engineering The rapid development of control technology has an impact on all areas of the control discipline The series offers an opportunity for researchers to present an extended exposition of new work in all aspects of industrial control

Class, Mass, and Collective Arbitration in National and International Law S.I. Strong, 2013-10-22 Class arbitration first developed in the United States in the 1980s as a means of providing large numbers of individuals with the opportunity to assert their claims at the same time and in the same proceeding Large scale arbitration has since spread beyond U S borders with collective arbitration being seen in Europe and mass arbitration being used in the international investment regime Class Mass and Collective Arbitration in National and International Law considers all three forms of arbitration as a matter of domestic and international law providing arbitrators advocates and scholars with the tools they need to evaluate these sorts of procedural mechanisms The book covers the best known decisions in the field *Stolt Nielsen S A v Animal Feeds International Corp* and *AT T Mobility LLC v Concepcion* from the U S Supreme Court and *Abaclat v Argentine Republic* from the world of investment arbitration as well as specialized rules promulgated by the American Arbitration Association JAMS and the German Institution of Arbitration DIS The text introduces dozens of previously undiscussed judicial opinions and covers issues ranging from contractual or treaty silence and waiver to regulatory concerns and matters of enforcement The book discusses the entire timeline of class mass and collective arbitration ranging from the devices historical origins through the present and into the future Lawyers in a wide variety of jurisdictions will benefit from the material contained in this text which is the first full length monograph to address large scale arbitration as a matter of national and international law
