RESEARCH MACHINES 380Z A POWERFUL LOW COST COMPUTER

SPECIFICATIONS

The RESEARCH MACHINES 380Z is a general purpose computer. It has been developed for professional users, using the latest technology available. The system is designed and manufactured in Oxford, England by RESEARCH MACHINES LIMITED.

The RESEARCH MACHINES 380Z computer system is aimed at supporting the rapidly developing use of low cost computers in the following fields:

EDUCATION As a stand alone computer and as a terminal
SCIENTIFIC COMPUTING
INDUSTRIAL AND LABORATORY PROCESS-CONTROL
INSTRUMENTATION AND DATA LOGGING
Z80 HARDWARE AND SOFTWARE DEVELOPMENT
DATA PROCESSING

The computing power now available on micro-processor based computers, and the range of software becoming available for them, is such that their performance is directly comparable to that of minicomputers.

The RESEARCH MACHINES 380Z includes VDU (visual display unit), cassette and keyboard interfaces, which means that it is not necessary to purchase a terminal or a teletype. The user only has to provide a domestic television and a suitable

cassette recorder. These and an ASCII encoded keyboard are plugged into sockets at the rear of the computer, and the system becomes fully operational.

CPU (Central Processing Unit)

The 380Z uses the Zilog Z80A microprocessor with a 4MHz clock. The bus is fully buffered and all I/O and memory in the system can be read by external devices by DMA (Direct Memory Access). WAIT state circuitry is included which can insert one wait state in every M1 cycle, or one wait state in every memory request cycle. The system is supplied with the latter option selected, so that relatively slow (500 nsec access time) peripherals can be connected to the bus. This gives an average cycle time approximately 60% faster than Z80 or 8080 systems operating with a 2MHz clock without wait states.

RAM (Random Access Memory)

The 380Z has sockets and circuitry for two blocks of dynamic RAM. Each block can either use 4K (4000) or 16K bit devices. 4K and 16K blocks can be mixed. Thus the basic 380Z can be supplied with up to 32K
