Colin Klein. *What the Body Commands. The Imperative Theory of Pain.* Cambridge, MA: MIT Press, 2015. 210 pp.

I

Uno de los proyectos de la filosofía de la mente contemporánea es el de la naturalización de la experiencia consciente. Este proyecto consiste en responder a la pregunta de cómo encaja la riqueza del mundo mental consciente, su particular subjetividad y su dimensión privada, en nuestra visión científica del mundo. La agenda cognitivista ha dado varios pasos en dirección a ese objetivo. Tal es el caso de la experiencia visual consciente a la que se ha identificado con estados provistos de contenido representacional indicativo, es decir, estados que informan al organismo acerca de algunas propiedades físicas del mundo (cf. Dretske 1995; Tye 1995, 2000). Sin embargo, para el caso del dolor tal contenido indicativo dejaría algo importante por fuera. El dolor, a diferencia de modalidades sensoriales como la visión y la audición, motiva a los organismos de manera directa a hacer algo. Su carácter motivacional lo distancia de estos estados sensoriales y, por tanto, el contenido del dolor puede ser distinto al contenido indicativo de tales modalidades perceptivas. Tal es la premisa inicial de *What the Body Commands*. En él, Colin Klein defiende a profundidad la tesis que ya ha presentado desde hace varios años:

el contenido del dolor tiene la forma de un imperativo (cf. 2007, 2010, 2012). Al sufrir una lesión, los dolores, en lugar de informar describiendo las propiedades físicas del daño tisular, dan una orden motora al organismo conducente a su protección corporal. De esta manera, Klein explica varios aspectos del dolor, y ofrece solución a algunos rompecabezas acerca de la experiencia dolorosa.

El libro puede dividirse en tres partes. En la primera, capítulos 1 al 4, Klein caracteriza el fenómeno que explicará, expone los presupuestos de los que parte y presenta a grandes rasgos el imperativismo y sus recursos teóricos. En la segunda, capítulos 5 al 9, el autor presenta con detalle el contenido del dolor y cómo este da cuenta de los diversos rasgos de la experiencia de dolor. La tercera, capítulos 10 al 14, es un poco miscelánea y en ella el autor motiva su teoría de diversas maneras, ya sea presentando cómo da cuenta de casos difíciles como la asimbolia al dolor y los placeres masoquistas, o argumentando por qué otros tipos de contenido no tienen el mismo poder explicativo. En esta reseña me concentraré en la primera parte, me ocuparé un poco menos de la segunda, me referiré brevemente a la tercera y haré unos comentarios finales en los que presento una preocupación respecto a la caracterización que hace Klein del dolor en tanto que objeto a explicar por su teoría.

II

Klein configura el fenómeno que va a explicar a partir de dos tesis. La primera

What The Body Commands The Imperative Theory Of Pain:

What the Body Commands Colin Klein, 2015-08-14 A novel theory of pain according to which pains are imperatives commands issued by the body ordering you to protect the injured part In *What the Body Commands* Colin Klein proposes and defends a novel theory of pain Klein argues that pains are imperative they are sensations with a content and that content is a command to protect the injured part of the body He terms this view imperativism about pain and argues that imperativism can account for two puzzling features of pain its strong motivating power and its uninformative nature Klein argues that the biological purpose of pain is homeostatic like hunger and thirst pain helps solve a challenge to bodily integrity It does so by motivating you to act in ways that help the body recover If you obey pain s command you get better in ordinary circumstances He develops his account to handle a variety of pain phenomena and applies it to solve a number of historically puzzling cases Klein s intent is to defend the imperativist view in a pure form without requiring pain to represent facts about the world Klein presents a model of imperative content showing that intrinsically motivating sensations are best understood as imperatives and argues that pain belongs to this class He considers the distinction between pain and suffering explains how pain motivates addresses variations among pains and offers an imperativist account of maladaptive pains pains that don t appear to hurt masochism and why pain feels bad

Experiencing Pain Sabrina Coninx, 2020-10-12 Although pain is one of the most fundamental and unique experiences we undergo in everyday life it also constitutes one of the most enigmatic and frustrating subjects for many scientists This book provides a detailed analysis of why this issue is grounded in the nature of pain itself It also offers a philosophically driven solution of how we may still approach pain in a theoretically compelling and practically useful manner Two main theses are defended i Pain seems inscrutable because there exists no property that is commonly shared by all types of pain and that is at the same time particular to pain setting it apart from other bodily sensations This applies irrespective of whether we consider the psychological dimensions neural networks causal relations or biological functions of pain Consequently it is impossible to refer to ideal far reaching and ideal distinct generalizations on the matter of pain ii Despite this challenge by focusing on the resemblance relations that hold across pains we can generate scientific progress in explaining predicting and treating pain In doing so the book aims to provide a clear conceptual basis for interdisciplinary communication and a useful heuristic for future research

Alsmith, Matthew R. Longo, 2022-11-30 Bodily awareness is one of the most interesting and enigmatic forms of experience Our earliest and most pervasive form of conscious experience it also arguably remains the most private Bodily awareness has also long played a central role in the study of the mind and self consciousness and is fundamental to much current philosophical and psychological research The

[Pain, the Opioid Epidemic, and Depression](#) Jeffrey F. Scherrer, Professor and Vice-Chair for Research Department of Family and Community Medicine, Jeffrey F. Scherrer, Jane C. Ballantyne, Professor Anesthesiology and Pain Medicine Department of Anesthesiology and Pain Medicine, Jane C. Ballantyne, 2024. Bringing together siloed areas to offer a comprehensive summary of decades of research, *Pain, the Opioid Epidemic, and Depression* is a comprehensive evaluation of the evidence for bidirectional and mutually reinforcing effects of pain, prescription opioid use, and mental illness, with a focus on depression.

Alien Experience Maura Tumulty, 2020. If I were a better human being that person's voice wouldn't sound so shrill to me. Many of us may have had such thoughts. They give voice to the worrying intuition that if we were less affected by sexism and racism or better at keeping our tempers, our fellow humans would look and sound differently to us. In *Alien Experience*, Maura Tumulty argues that we should take this sense of unease seriously. It is as philosophically significant as our unease over desires or fears that we disown. Making sense of this unease requires us to re-think the relation between experiences and standing commitments, to re-consider what we mean by self-control, and to attend to empirical questions about perception, attention, and tacit cognition. In taking up these issues, *Alien Experience* illuminates and questions a significant assumption that underlies debates in the philosophy of mind, moral psychology, and ethics. While we may be answerable morally, ethically, legally for our attitudes and emotions, we are not answerable in any interesting way for our perceptions and sensations. Tumulty argues that this assumption leads to a flattened view of the ways experiences are related to agency. Recognizing that we can be alienated from our experiences helps us appreciate distinctive opportunities for self-improvement. [Suffering and Virtue](#) Michael S. Brady, 2018-07-12. Suffering in one form or another is present in all of our lives. But why do we suffer? On one reading, this is a question about the causes of physical and emotional suffering. On another, it is a question about whether suffering has a point or purpose or value. In this ground-breaking book, Michael Brady argues that suffering is vital for the development of virtue, and hence for us to live happy or flourishing lives. After presenting a distinctive account of

suffering and a novel interpretation of its core element unpleasantness Brady focuses on three claims that are central to his picture The first is that forms of suffering like pain and remorse can themselves constitute virtuous responses The second is that suffering is essential for four important classes of virtue virtues of strength such as fortitude and courage virtues of vulnerability such as adaptability and humility moral virtues such as compassion and the practical and epistemic excellences that make up wisdom His third and final claim is that suffering is vital for the social virtues of justice love and trust and hence for the flourishing of social groups

The Emotional Mind Tom Cochrane, 2019-01-10 In this book Tom Cochrane develops a new control theory of the emotions and related affective states Grounded in the basic principle of negative feedback control his original account outlines a new fundamental kind of mental content called valent representation Upon this foundation Cochrane constructs new models for emotions pains and pleasures moods expressive behaviours evaluative reasoning personality traits and long term character commitments These various states are presented as increasingly sophisticated layers of regulative control which together underpin the architecture of the mind as a whole Clearly structured and containing numerous diagrams and examples to illustrate the discussion this study draws on the latest research from fields including philosophy psychology and neuroscience and will appeal to readers interested in the philosophy and cognitive science of emotion
