Feminism's Queer Temporalities Sam McBean, 2015-07-16 Despite feminism's uneven movements it has been predominantly understood through metaphors of generations or waves Feminism's Queer Temporalities builds on critiques of the limitations of this linear model to explore alternative ways of imagining feminism's timing It finds in feminism's literary and cultural archive narratives of temporality that might now be diagnosed as queer where queer designates modes of being historical that exceed the linear and the generational Few theorists have looked to popular feminist figures literature and culture to theorize feminism's timing Through methodologically creative readings McBean explores non generational anti linear and asynchronous time in the figure of Antigone Marge Piercy's *Woman on the Edge of Time* the film *Ladies and Gentlemen The Fabulous Stains* Valerie Solanas and *SCUM Manifesto* and Alison Bechdel's *Fun Home* The first to substantially bring together the ways in which time has come to matter in both feminist and queer disciplines this book will appeal to students and scholars of feminist queer and gender studies cultural studies and literary studies

Secrecy and Silence in the Research Process Roisin Ryan-Flood, Rosalind Gill, 2013-05-13 Feminist research is informed by a history of breaking silences of demanding that women's voices be heard recorded and included in wider intellectual genealogies and histories This has led to an emphasis on voice and speaking out in the research endeavour Moments of secrecy and silence are less often addressed This gives rise to a number of questions What are the silences secrets omissions and and political

consequences of such moments What particular dilemmas and constraints do they represent or entail What are their implications for research praxis Are such moments always indicative of voicelessness or powerlessness Or may they also constitute a productive moment in the research encounter Contributors to this volume were invited to reflect on these questions The resulting chapters are a fascinating collection of insights into the research process making an important contribution to theoretical and empirical debates about epistemology subjectivity and identity in research Researchers often face difficult dilemmas about who to represent and how what to omit and what to include This book explores such questions in an important and timely collection of essays from international scholars

Class, Self, Culture Beverley Skeggs, 2013-11-05 Class Self Culture puts class back on the map in a novel way by taking a new look at how class is made and given value through culture It shows how different classes become attributed with value enabling culture to be deployed as a resource and as a form of property which has both use value to the person and exchange value in systems of symbolic and economic exchange The book shows how class has not disappeared but is known and spoken in a myriad of different ways always working through other categorisations of nation race gender and sexuality and across different sites through popular culture political rhetoric and academic theory In particular attention is given to how new forms of personhood are being generated through mechanisms of giving value to culture and how what we come to know and assume to be a self is always a classed formation Analysing four processes of inscription institutionalisation perspective taking and exchange relationships it challenges recent debates on reflexivity risk rational action theory individualisation and mobility by showing how these are all reliant on fixing some people in place so that others can move
