Wheres The Learning In Service Learning:

Where's the Learning in Service-Learning? Janet Eyler, 1999-05-07 As academic service learning continues to grow rapidly practitioners are discovering a pressing need for solid empirical research about learning outcomes Where s the Learning in Service Learning helps define learning expectations presents data about learning and links program characteristics with learning outcomes It is the first book to explore the experience of service learning as a valid learning activity

Where's the Wisdom in Service-Learning? Robert Shumer, 2017-04-01 The service learning field is 50 years old in the United States Much has been developed over that time in the fields of K 12 schooling higher education and community organizations People who have been involved in the movement have worked individually and collaboratively to include servicelearning as an effective pedagogy and program in educational settings They have created opportunities for students teachers faculty and community members to learn about academic content and personal commitment to serving others for social change and community impact In this book we hear from individuals who have been involved in the effort for more than 30 or 40 years about what they have learned from their experiences and what wisdom they can share with others who will be involved for the next several decades Their experience insight and understanding will hopefully help younger people to improve and expand on the movement and place service learning and community engagement as a regular part of American education Robert Shumer has been a stalwart of the service learning movement for decades He s a practitioner a researcher an experimenter This book gives valuable perspective for all of us going forward Paul Loeb Author of Soul of a Citizen At a moment when many are asking how higher education can better serve our democracy Robert Shumer s book reminds us that we still have much to learn from those who built the movement for community engagement through service learning As befits the field the chapters in this book derive wisdom from experience and in so doing give us insight and inspiration for identifying the way forward Andrew J Seligsohn President Campus Compact This book provides a strong foundation for promoting discussions on how the service learning movement has evolved over the past 30 40 years Rob Shumer has pulled together several key leaders in the service learning movement to share their stories and experiences This book will be useful to a younger generation of service learning practitioners and faculty who will continue to build the field that these pioneers so generously cultivated Elaine K Ikeda Ph D Executive Director California Campus Compact **Faculty**

Service-Learning Guidebook Christine M. Cress, Stephanie T. Stokamer, Thomas J. Van Cleave, Joyce P. Kaufman, 2023-07-03 This is a practical guide to designing teaching and coordinating service learning courses and for developing reciprocal community partnerships and community based research through a lens of equity that addresses the endemic racial social economic and environmental disparities across society The text provides a comprehensive framework for developing both in person and on line service learning with a chapter on virtual delivery of courses that integrates the principles and practices described throughout the book The authors uniquely integrate the how to of conducting service

learning with the theoretical foundations to enact effective equitable and inclusive community engagement. Given this moment of enormous social inequality and divisiveness, the authors offer a new definition and set of educational principles that they characterize as Equity Centered Community Engagement Excellence. These principles serve to guide academic and community engagement that is democratic, recognizes the voice and expertise of community partners, addresses the power imbalances between communities and academic institutions, and develops an educational experience that is potentially transformative and promotes civic responsibility. Informed by the literature of critical service learning, critical race theory, intercultural communication theory, and social constructivism, this book attempts to deconstruct the assumption of the preeminence of academic knowledge to reconstruct a new operational paradigm of equity centeredness that validates community capacity to guide faculty in their redesign of service learning curriculum, activities, collaborations, and scholarship. It is based on the principles of Student Agency demonstrated as enhanced skills, knowledge, and motivation; Community Efficacy; recognition of community assets and capacity building; Scholarly Advocacy leveraging evidence-based research based for equity centered learning serving and social justice. The authors offer examples of syllabi, lessons, and assignments, reflection questions, evaluation rubrics, as well as an array of teaching tips that illustrate strategies for use in the classroom and in the field. The book is addressed to faculty embarking on service learning and to seasoned scholar-practitioners looking for innovative ideas, as well as to campus administrators who coordinate community outreach or college student volunteer services, offering guidance on leveraging resources and fiscal support from external stakeholders. It is also designed to serve as a resource for professional development workshops and faculty scholar learning communities. It offers a rich compendium of ideas and examples from which faculty and practitioners can select exercises and elements to incorporate or adapt for their courses, whether designing short-term engagements or extended service learning programs.

Teaching Food and Culture Candice Lowe Swift, Richard R. Wilk, 2016-07-01. With the rapid growth and interest in food studies around the U.S. and globally, the original essays in this one-of-a-kind volume aid instructors in expanding their teaching to include both the latest scholarship and engage with public debate around issues related to food. The chapters represent the product of original efforts to develop ways to teach both with and about food in the classroom, written by innovative instructors who have successfully done so. It would appeal to community college and university instructors in anthropology and social science disciplines who currently teach or want to develop food-related courses. This book illustrates the creative ways that college instructors have tackled teaching about food and used food as an instructional device. It aims to train the next generation of food scholars to deal with the complex problems of feeding an ever-increasing population. It contains an interview with Sidney Mintz, the most influential anthropologist shaping the study of food.

Service-Learning Iqbal Ahmad, Rani Gul, 2023-11-17. This book examines key concepts, principles, and applications of the service learning approach. Service learning is a community-based educational approach to improve a student's academic, personal, leadership, civic, and professional

development through civic engagement Unlike other traditional approaches to education service learning students can use their classroom based knowledge and skills in a real life context in collaboration with community organisations and residents This volume explores the theory research and practices of how service learning is understood implemented and evaluated in different contexts It provides essential guidelines to implement and integrate service learning at educational institutions through extensive discussions on the principles philosophical challenges opportunities and its applications Key themes include Theory of service learning Concept of service learning Challenges to service learning Applications of service learning Service learning as professional development Service learning as communication Accessibly written this book would be of interest to faculty students community organisations and researchers working in the areas of education pedagogy sociology and social work

In Search of Servant Leadership Dr. Abeni El-Amin, 2017-11-27 The National and Community Service Trust Act of 1990 defined service learning SL as a method by which students learn and develop through active participation in thoughtfully organized service experiences that meet actual community needs and

- 1 that are coordinated in collaboration with the school and community
- 2 that is integrated into the student's academic curriculum or provides structured time for a student to reflect upon service
- 3 that provides students with opportunities to use newly acquired skills and knowledge in real life situations in their own communities and
- 4 that enhances what is taught in school by extending student learning beyond the classroom and into the community and helps to foster the development of civic responsibility

Thus SL is a method that permits students to learn and develop through active participation in thoughtfully organized service projects in communities that also meet the needs of communities
