Proceedings of the 25th European Conference on Knowledge Management (2 vols) Aino Kianto, Ilona Toth, *Green Food* Dustin Mulvaney, 2010-05-04 This third volume in the SAGE Series on Green Society lays out the contours of the field of agri food studies It draws on scholars working in the fields of political ecology rural sociology geography and environmental studies to paint a picture of the past present and future of agriculture and food It provides readers with a basic understanding of the institutions practices and concepts to identify what is and is not a green food Because food is so intimately connected to our daily lives the food system offers perhaps the most promise to make change in a sustainable direction This volume addresses what a sustainable and green food system might look like what policies would help realize it and what kinds of tradeoffs we face in deciding which paths to choose *Green Food An A to Z Guide* provides people interested in food and agricultural systems the basic analytical and conceptual ideas that explain why our food system looks the way it does and what can be done to change it for the better Roughly 150 entries discuss how to address issues related to a green food system and vivid photos searchable hyperlinks numerous cross references an extensive resource guide and a clear accessible writing style make the Green Society volumes ideal for classroom use

Livelihood and Landscape Change in Africa: Future Trajectories

for Improved Well-Being under a Changing Climate Sheona Shackleton, Paul Hebinck, Chinwe Ifejika Speranza, Vanessa Masterson, Dian Spear, Maria Tengö, 2019-10-08 This book is based on a Special Issue of the journal LAND that draws together a collection of 11 diverse articles at the nexus of climate change landscapes and livelihoods in rural Africa all explore the links between livelihood and landscape change including shifts in farming practices and natural resource use and management The articles which are all place based case studies across nine African countries cover three not necessarily mutually exclusive thematic areas namely smallholder farming livelihoods under new climate risk five articles long term dynamics of livelihoods and landscape change and future trajectories two articles and natural resource management and governance under a changing climate spanning forests woodlands and rangelands four articles The commonalities key messages and research gaps across the 11 articles are presented in a synthesis article All the case studies pointed to the need for an integrated and in depth understanding of the multiple drivers of landscape and livelihood change and how these interact with local histories knowledge systems cultures complexities and lived realities Moreover where there are interventions such as new governance systems REDD or climate smart agriculture it is critical to interrogate what is required to ensure a fair and equitable distribution of emerging benefits Herbicides and Environment Andreas

Kortekamp, 2011-01-08 Herbicides are much more than just weed killers They may exhibit beneficial or adverse effects on other organisms Given their toxicological environmental but also agricultural relevance herbicides are an interesting field of activity not only for scientists working in the field of agriculture It seems that the investigation of herbicide induced effects on weeds crop plants ecosystems microorganisms and higher organism requires a multidisciplinary approach Some important aspects regarding the multisided impacts of herbicides on the living world are highlighted in this book I am sure that the readers will find a lot of helpful information even if they are only slightly interested in the topic **The Oxford**

Handbook of Agricultural History Jeannie M. Wayne, 2024 Agricultural history has enjoyed a rebirth in recent years in part because the agricultural enterprise promotes economic and cultural connections in an era that has become ever more globally focused but also because of agriculture's potential to lead to conflicts over precious resources The Oxford Handbook of Agricultural History reflects this rebirth and examines the wide reaching implications of agricultural issues featuring essays that touch on the green revolution the development of the Atlantic slave plantation the agricultural impact of the American Civil War the rise of scientific and corporate agriculture and modern exploitation of agricultural labor

Sustaining our Environment for Better Future Abdelnaser Omran, Odile Schwarz-Herion, 2019-08-05 This book covers a variety of topics regarding environmental practices in our day to day lives as well as topics concerning sustainable development as a broader concept embracing ecological social and economic aspects to improve the quality of life for people around the world Starting with the traditional controversy between the neoclassical economy and sustainable economy which may be overcome by scientific progress due to more intensive scientific studies of the sustainability paradigm the book

proceeds to discuss various problems and challenges regarding environmental protection and sustainable development in different countries and on different continents This includes analyses of recent sometimes fatal mining disasters in South and North America challenges and opportunities for rural development in Africa and Australia an exploration of the role of women for sustainable development in Palestine water safety and water security issues in Asia and Australia the environmental exploitation of popular tourism destinations like Acapulco and deforestation in Malaysia suggesting innovative approaches to turn challenges into opportunities to effectively tackle these problems Other topics addressed involve sustainable energy creation for future generations a research survey among Romanian students on sustainable consumption behavior validity testing for a heat transfer model in a greenhouse and a case study on sustainability risk management practices at Malaysia s environmentally sensitive companies The book closes with an examination of highly digitalized Smart Cities as a potentially valuable complement to conventional urban and rural lifestyles in connection with achieving the UN Sustainable Development Goals SDGs

The Shrimp Book II Victoria Alday-Sanz,2021-12-31 As the world s population continues to grow so does the demand for seafood Technological advances have enabled shrimp farming to change from traditional small scale businesses into a global industry This has contributed to problems with serious disease outbreaks which have already caused several regional wipe outs of farm shrimp populations The shrimp farming industry continues to grow and there is a need for a source of reliable and detailed information on shrimp farming best practice and new developments aimed at the shrimp industry to facilitate future sustainable growth of the industry The Shrimp Book published in 2010 was written from the academic perspective The Shrimp Book II s focus is towards the industry perspective 5m Books

Managing the Unknown Frank Uekötter,Uwe Lübken,2014-03-01 Information is crucial when it comes to the management of resources But what if knowledge is incomplete or biased or otherwise deficient How did people define patterns of proper use in the absence of cognitive certainty Discussing this challenge for a diverse set of resources from fish to rubber these essays show that deficient knowledge is a far more pervasive challenge in resource history than conventional readings suggest Furthermore environmental ignorance does not inevitably shrink with the march of scientific progress these essays suggest more of a dialectical relationship between knowledge and ignorance that has different shapes and trajectories With its combination of empirical case studies and theoretical reflection the essays make a significant contribution to the interdisciplinary debate on the production and resilience of ignorance At the same time this volume combines insights from different continents as well as the seas in between and thus sketches outlines of an emerging global resource history

Ethics, Law and Society Jennifer Gunning,2017-07-28 This key collection brings together a selection of papers commissioned and published by the Cardiff Centre for Ethics Law Society It incorporates contributions from a group of international experts along with a selection of short opinion pieces written in response to specific ethical issues The collection addresses issues arising in biomedical and medical ethics ranging from assisted reproductive technologies to the

role of clinical ethics committees It examines broader societal issues with particular emphasis on sustainability and the environment and also focuses on issues of human rights in current global contexts The contributors collect responses to issues arising from high profile cases such as the legitimacy of war in Iraq to physician related suicide The volume will provide a valuable resource for practitioners and academics with an interest in ethics across a range of disciplines

Scherr, Jeffrey A. McNeely, 2012-09-26 A growing body of evidence shows that agricultural landscapes can be managed not only to produce crops but also to support biodiversity and promote ecosystem health Innovative farmers and scientists as well as indigenous land managers are developing diverse types of ecoagriculture landscapes to generate cobenefits for production biodiversity and local people Farming with Nature offers a synthesis of the state of knowledge of key topics in ecoagriculture The book is a unique collaboration among renowned agricultural and ecological scientists leading field conservationists and farm and community leaders to synthesize knowledge and experience across sectors The book examines the knowledge base for ecoagriculture as well as barriers gaps and opportunities for developing improved ecoagriculture systems what we have learned about managing landscapes to achieve multiple objectives at a landscape scale existing incentives for farmers other land managers and investors to develop and invest in ecoagriculture systems pathways to develop implement manage and scale up successful ecoagriculture Insights are drawn from around the world in tropical Mediterranean and temperate environments from farming systems that range from highly commercialized to semi subsistence Farming with Nature is an important new work that can serve as a foundation document for planners farm organizations researchers project developers and policy makers to develop strategies for promoting and sustaining ecoagriculture landscapes Replete with valuable best practice guidelines it is a critical resource for both practitioners and researchers in the field What a Bee Knows Stephen L. Buchmann, 2023-03-07 For many of us the buzzing of a bee elicits panic But the next time you hear that low droning sound look closer the bee has navigated to this particular spot for a reason using a fascinating set of tools She may be using her sensitive olfactory organs which provide a 3D scent map of her

surroundings She may be following visual landmarks or instructions relayed by a hive mate She may even be tracking electrostatic traces left on flowers by other bees What a Bee Knows Exploring the Thoughts Memories and Personalities of Bees invites us to follow bees mysterious paths and experience their alien world Although their brains are incredibly small just one million neurons compared to humans 100 billion bees have remarkable abilities to navigate learn communicate and remember In What a Bee Knows entomologist Stephen Buchmann explores a bee s way of seeing the world and introduces the scientists who make the journey possible We travel into the field and to the laboratories of noted bee biologists who have spent their careers digging into the questions most of us never thought to ask for example Do bees dream And if so why With each discovery Buchmann s insatiable curiosity and sense of wonder is infectious What a Bee Knows will challenge your idea of a bee s place in the world and perhaps our own This lively journey into a bee s mind reminds us that the world is more complex than our senses can tell us Biological Approaches to Sustainable Soil Systems Norman Uphoff,Andrew S.

Ball,Erick Fernandes,Hans Herren,Olivier Husson,Mark Laing,Cheryl Palm,Jules Pretty,Pedro Sanchez,Nteranya Sanginga,Janice Thies,2006-03-03 Global agriculture is now at the crossroads The Green Revolution of the last century is losing momentum Rates of growth in food production are now declining with land and water resources becoming scarcer while world population continues to grow We need to continue to identify and share the knowledge that will support successful and sustainable **Food Ethics** Franz-Theo Gottwald,Hans Werner Ingensiep,Marc Meinhardt,2010-03-10 In this first decade of the 21st century more than 854 million people in the world are starving while industrial nations are debating about obesity generating energy from food plants and a myriad of other topics many African and south Asian nations could only fathom In this great discord there have arisen many interdisciplinary discussions about problems in the field of applied Ethics with regards to food that are crossing a considerably wide spectrum of disciplines such as obesity traceability agro food biotechnology dairy industry transgenic plants novel food bio fuels world trade system etc This book presents international discussions and information concerning food ethics in its current state It presents a variety of important aspects in the field of food ethics with respect to positions instruments and applications of issues surrounding nutrition A great deal of the book will concern itself with discussing different ethical positions and problems of current interests as explained by experts of the food ethics community The articles will focus on the reality of global food problems through two main issues current questions of nutrition in the specific contexts of field and experience ethical tools ideas and suggestions concerning long term steps for solutions The appendix presents a collection of current declarations and political statements visions proposals and goals in a worth living world in general and concerning specific problems water healthy food the human right to food sustainability and food sovereignty **Agricultural Subsidies in the WTO Green Box** Ricardo

Meléndez-Ortiz,Christophe Bellmann,Jonathan Hepburn,2009-12-03 Growing evidence suggests that green box farm subsidies may in fact affect production and trade harm farmers in developing countries and cause environmental damage

This book brings together new research and analysis examining the relationship between green box subsidies and sustainable development goals and explores options for future reform Environmental Management Accounting and Supply Chain Management Roger L. Burritt, Stefan Schaltegger, Martin Bennett, Tuula Pohjola, Maria Csutora, 2011-05-19 This volume's focus on the environmental accounting of supply chain processes is of particular relevance because these processes supply data about the environmental impact of relationships between business organisations an area where the boundary separating internal and external accounting is ill defined Here contributors advocate what they term accounting for cooperation as a more environmentally positive complement to the paradigmatic practice of accounting for competition **Food Security and Soil Quality** Rattan Lal, B.A. Stewart, 2010-06-23 Just five years ago it was generally believed that the number of food insecure people in the world was on continuous decline Unfortunately widespread soil degradation along with resistance to recommended agronomic practices and little attempt to restore degraded soils have conspired with significant droughts in regions that could least tolerate Biodiversity, Ecosystem Functioning, and Human Wellbeing Shahid Naeem, Daniel E. Bunker, Andy Hector, Michel Loreau, Charles Perrings, 2009-07-30 How will biodiversity loss affect ecosystem functioning ecosystem services and human well being In an age of accelerating biodiversity loss this timely and critical volume summarizes recent advances in biodiversity ecosystem functioning research and explores the economics of biodiversity and ecosystem services The book starts by summarizing the development of the basic science and provides a meta analysis that quantitatively tests several biodiversity and ecosystem functioning hypotheses It then describes the natural science foundations of biodiversity and ecosystem functioning research including quantifying functional diversity the development of the field into a predictive science the effects of stability and complexity methods to quantify mechanisms by which diversity affects functioning the importance of trophic structure microbial ecology and spatial dynamics Finally the book takes research on biodiversity and ecosystem functioning further than it has ever gone into the human dimension describing the most pressing environmental challenges that face humanity and the effects of diversity on climate change mitigation restoration of degraded habitats managed ecosystems pollination disease and biological invasions However what makes this volume truly unique are the chapters that consider the economic perspective These include a synthesis of the economics of ecosystem services and biodiversity and the options open to policy makers to address the failure of markets to account for the loss of ecosystem services an examination of the challenges of valuing ecosystem services and hence to understanding the human consequences of decisions that neglect these services and an examination of the ways in which economists are currently incorporating biodiversity and ecosystem functioning research into decision models for the conservation and management of biodiversity A final section describes new advances in ecoinformatics that will help transform this field into a globally predictive science and summarizes the advancements and future directions of the field The ultimate conclusion is that biodiversity is an essential element of any strategy for sustainable development
