This revised edition of *Missions and Money* offers new reflections in the light of a changed situation in Christian missionary circles. Bonk offers new reflections in the lights of a changed situation now marked by increases in the number of short term missionaries and increases in the numbers of Asians Africans and Latin Americans leaving their homelands to serve as missionaries to other people. The conversation on the ambiguity of wealth and Christian missionary outreach is deepened with essays by Christopher J H Wright on the righteous rich in the Hebrew Bible and by Justo Gonzalez on faith and wealth in the Christian Bible and the early church. Book jacket *A New Science of Religion* Gregory W. Dawes, James Maclaurin, 2013. Religious belief once in the domain of the humanities has found a new home in the sciences. Promising new developments in the study of religion by cognitive scientists and evolutionary theorists put forward empirical hypotheses regarding the origin spread and character of religious beliefs. Different theories deal with different aspects of human religiosity some focus on religious beliefs while others focus on religious actions and still others on the origin of religious ideas. While these theories might share a similar focus there is plenty of disagreement in the explanations they offer. This volume examines the diversity of new scientific theories of religion by outlining the logical and causal relationships between these enterprises. Are they truly in competition as their proponents sometimes suggest or are they complementary and mutually illuminating accounts of religious belief and practice. Cognitive science has gained much from an interdisciplinary focus on mental function and this volume explores the benefits that can be gained from a similar approach to the scientific study of religion. **Dying to Win** Robert Pape, 2006-07-25.
