Interactive Lecturing Elizabeth F. Barkley, Claire H. Major, 2018-02-28 Tips and techniques to build interactive learning
 into lecture classes Have you ever looked out across your students only to find them staring at their computers or
 smartphones rather than listening attentively to you Have you ever wondered what you could do to encourage students to
 resist distractions and focus on the information you are presenting Have you ever wished you could help students become
 active learners as they listen to you lecture Interactive Lecturing is designed to help faculty members more effectively
 lecture This practical resource addresses such pertinent questions as How can lecture presentations be more engaging How
 can we help students learn actively during lecture instead of just sitting and passively listening the entire time Renowned
 authors Elizabeth F Barkley and Claire H Major provide practical tips on creating and delivering engaging lectures as well as
 concrete techniques to help teachers ensure students are active and fully engaged participants in the learning process before
 during and after lecture presentations Research shows that most college faculty still rely predominantly on traditional
 lectures as their preferred teaching technique However research also underscores the fact that more students fail lecture
 based courses than classes with active learning components Interactive Lecturing combines engaging presentation tips with
 active learning techniques specifically chosen to help students learn as they listen to a lecture It is a proven teaching and
 learning strategy that can be readily incorporated into every teacher's methods In addition to providing a synthesis of
 relevant contemporary research and theory on lecturing as it relates to teaching and learning this book features 53 tips on
 how to deliver engaging presentations and 32 techniques you can assign students to do to support their learning during your
 lecture The tips and techniques can be used across instructional methods and academic disciplines both onsite including
 small lectures and large lecture halls as well as in online courses This book is a focused up to date resource that draws on
 collective wisdom from scholarship and practice It will become a well used and welcome addition for everyone dedicated to
 effective teaching in higher education **History 5-11** Hilary Cooper, 2025-12-01 The 4th edition of the bestselling History
 5 11 A Guide for Teachers is written in response to the Ofsted History Subject Report Rich Encounters with the Past July

2023 and offers numerous pathways for teachers to construct their own curriculum from the Foundation Stage to Year 6 This book highlights how this may be done in coherent ways which enable children to remember and continuously build on their historical understanding Part 1 considers how the discipline of history has evolved and how school history has changed as a result Part 2 considers how children can progress in understanding and applying disciplinary skills in history in increasingly complex ways Part 3 suggests how a variety of hinterland knowledge can link to enquiry questions and support rich understanding of substantive knowledge It considers diversity of different kinds and the big picture making connections between societies in different times and places Part 4 suggests ways of collaboratively revising or constructing a rich whole school curriculum plan related study units and monitor record and assess pupil progress It concludes by explaining how teachers can take ownership of change by sharing and publishing their teaching approaches rather than see managing change solely as a top down process There is detailed structured guidance on how colleagues can work together in sequenced steps and throughout the age range to construct a curriculum of which they have ownership and which is both flexible and based on planning for children s developing understanding of the past The guidance is enjoyable and not too time consuming There are detailed sections on planning topics within the whole school curriculum and on forming shared ideas about monitoring and recording progress Supported throughout by examples from case studies and of children s work and talk this is an essential resource for student teachers on school placements teaching assistants and teachers with all levels of experience
