Social Domains of Truth Lambert Zuidervaart,2023-03-10 Truth is in trouble In response this book presents a new conception of truth It recognizes that prominent philosophers have questioned whether the idea of truth is important Some have asked why we even need it Their questions reinforce broader trends in Western society where many wonder whether or why we should pursue truth Indeed some pundits say we have become a post truth society Yet there are good reasons not to embrace the cultural Zeitgeist or go with the philosophical flow reasons to regard truth as a substantive and socially significant idea This book explains why First it argues that propositional truth is only one kind of truth an important kind but not all important Then it shows how propositional truth belongs to the more comprehensive process of truth as a whole This process is a dynamic correlation between human fidelity to societal principles and a life giving disclosure of society The correlation comes to expression in distinct social domains of truth where either propositional or nonpropositional truth is primary The final chapters lay out five such domains science politics art religion and philosophy Anyone who cares about the future of truth in society will want to read this pathbreaking book

Modern World History: Patterns of Interaction Holt McDougal,2001-01 *Globalizing Patient Capital* Stephen B. Kaplan,2021-07-15 China s overseas financing is a distinct form of patient capital that marshals the country s vast domestic resources to create commercial opportunities internationally Its long term risk tolerance and lack of policy conditionality has allowed developing economies to sidestep the fiscal austerity tendencies of Western markets and multilaterals Employing statistical tests and extensive field research across China and Latin America Stephen Kaplan finds that China s patient capital endows national governments with more room to maneuver in formulating domestic policies The author goes on to evaluate the potential costs of Chinese financing raising the question of how Chinese lenders will react to developing nation s ongoing struggles with debt and dependency By disaggregating the structure of international finance *Globalizing Patient Capital* has significant implications for the rise of China in Latin America offering new insights about globalization and showing the costs and benefits of state versus market approaches to development

Shattering Silos Lambert Zuidervaart,2022-08-15 Questions first raised by Hannah Arendt in the 1960s take on new urgency in the post truth era as political leaders blithely reject facts in the public domain Is truth politically impotent Are politics inherently false Is the search for truth still relevant *Shattering Silos* a companion volume to *Religion Truth and Social Transformation* and *Art Education and Cultural Renewal* provides a path breaking response As in his two previous books Lambert Zuidervaart challenges the boundaries philosophers set up between epistemology ethics and political philosophy Knowledge he argues takes different forms in various social domains and all are subject to political struggle A critique of contemporary society must draw on many social domains of knowledge including the arts and religion and should recast politics as a striving for

truth in the broadest sense Proposing a new conception of truth one that emphasizes the unity of knowledge and truth as well as their diversity among different social domains Zuidervaart asks what such holism and pluralism suggest about how we understand politics and society This book proposes a new understanding of large scale social change challenging how most people think about knowledge and truth Interweaving epistemology social criticism and political thought Shattering Silos aims to help redirect an allegedly post truth society
