possibilities that might emerge for pedagogy when alternative metaphors images and structures are considered for writing and curriculum The volume includes qualitative and narrative description of writing and literacy situations events and pedagogy and elaborates the historical theoretical and curricular background in which such instruction exists within contemporary schooling Reinventing Curriculum A Complex Perspective on Literacy and Writing addresses literacy through a focus on writing rather than on reading develops an approach to literacy and writing pedagogy that incorporates recent theories and research on learning and the complexity sciences examines perspectives on writing from both a teaching perspective and that of the work of writers makes connections between the acquisition of literacy to research in other domains examines both the benefits and the costs of literacy and challenges commonsense understandings within instruction for example that literacy teaching and learning can occur apart from other aspects of children s learning context and subjectivity or that learning occurs individually rather than collectively This book is important reading for researchers professionals teacher educators and students involved in literacy education and writing instruction and an excellent text for courses in these areas
