Faux Titre est une collection d'études en littérature française. Depuis cinquante ans, elle offre une sélection d'essais de haute envergure couvrant l'ensemble du domaine de la recherche littéraire de la littérature médiévale jusqu'à l'extrême contemporain. La collection offre également une plateforme pour de nouvelles pistes de recherche comme les études de traduction, les littératures minoritaires, les études du genre et queer, l'écologie, les sciences humaines médicales, études hispaniques, études transatlantiques, études de réseaux et sciences sociales, ainsi que des réflexions sur les études en littérature française en tant que discipline. Faux Titre is a longstanding book series for state of the art research in the field of French language literature. Besides the more classical research in French literature covering the field of Medieval Studies to 21st century literature, the series offers a platform for new directions in literary studies in relation to translation studies, minority literatures, gender and queer studies, ecology, medical humanities, hemispheric studies, transatlantic studies, network studies and social sciences as well as reflections on studies in French literature as a discipline. Authors are cordially invited to submit proposals and/or full manuscripts to the publisher at BRILL.

Christa Stevens Please advise our Guidelines for a Book Proposal      *Entranced by Story* Hugh Crago, 2014-04-24

We live in a world of stories yet few of us pause to ask what stories actually are, why we consume them so avidly and what they do for story makers and their audiences. This book focuses on the experiences that good stories generate: feelings of purposeful involvement, elevation, temporary loss of self, vicarious emotion and relief of tension. The author examines what drives writers to create stories and why readers fall under their spell, why some children grow up to be writers and how the capacity for creating and comprehending stories develops from infancy right through into old age. *Entranced by Story* applies recent research on brain function to literary examples ranging from the Iliad and Wuthering Heights to Harold and the Purple Crayon, providing a groundbreaking exploration of the biological and neurological basis of the literary experience. Blending research, theory and biographical anecdote, the author shows how it is the unique structure of the human brain with its layering of sophisticated cognitive capacities upon archaic, emotion-driven functions which best explains the mystery of story.
