House of Commons - Committee of Public Accounts: Progress in Delivering the Thameslink Programme - HC 296 Great Britain: Parliament: House of Commons: Committee of Public Accounts,2013-10-29 The first proposals to modernize the Thameslink route and increase capacity were developed by a succession of rail industry sponsors but nothing much happened until the Department for Transport became sponsor in 2005 The Department has delivered the first phase of the infrastructure project under budget and on time The other two aspects of the programme are going less well The procurement of new trains through a 1.6 billion PFI deal has taken over three years longer than expected And the timetable and approach for letting the new franchise have been revised The planned completion date has been put back to 2018 But meeting the timetable for delivering the new trains will be very demanding and risky The Committee is also sceptical about using PFI to fund this project It is alarming that the Department compared the PFI option against only one other private sector option and did not construct a public sector comparator to understand better the relative costs risks and rewards of choosing a PFI funding route over a public one Another source of worry is the small size of the Department s core Thameslink team just five people for a programme of this size and complexity The impression that there is a scarcity of these skills is reinforced by the apparent need to move the key civil servant leading the Thameslink team the man whose experience skills and continuity have been crucial to the delivery of the programme over to the High Speed 2 team **Hearings** United States.
