Western Diseases Western Diseases:

Western Diseases, Their Emergence and Prevention Hubert Carey Trowell, Denis Parsons Burkitt, Denis P. Burkitt, 1981 In this major synthesis of cross cultural research 34 distinguished scientists study 25 common metabolic and degenerative diseases characteristic of all advanced Western nations and then examine their incidence in developing countries among both hunter gatherers and peasant agriculturalists Thus the authors provide a unique opportunity to compare epidemiological data reflecting modern modes of life with data influenced by habits and diets dating back 400 generations to the advent of agriculture and even 200 000 generations or more to the dawn of man The results confirm the view that diseases like hypertension lung cancer diverticular disease and appendicitis are maladaptations to environmental factors introduced since the Industrial Revolution They also demonstrate that such diseases become more prevalent when Western lifestyles are adopted in primitive societies Certain studies reveal a regression of disease incidence when exercise is increased and a diet high in starch and fiber low in fat and salt is resumed characteristics of a simpler way of life Western Diseases greatly broadens our perspective on some of the most vexing health problems in our society It will be an essential reference for epidemiologists nutritionists and gastroenterologists in particular

The Treatment of Modern Western Medical Diseases with Chinese Medicine Bob Flaws, Philippe Sionneau, 2001 This book is a textbook and clinical manual on the treatment of modern Western medical diseases with Chinese medicine By modern Western medical diseases we mean all the disease categories of Western medicine excluding gynecology and pediatrics By Chinese medicine we mean standard contemporary professional Chinese medicine as taught at the two dozen provincial Chinese medical colleges in the People's Republic of China The two main therapeutic modalities used in the practice of this style of Chinese medicine are acupuncture moxibustion and the internal administration of multi ingredient Chinese medicinal formulas Treatment plans for each disease discussed herein are given for each of these two main modalities

Food and Western Disease Staffan

Lindeberg, 2010-01-11 Nutrition science is a highly fractionated contentious field with rapidly changing viewpoints on both minor and major issues impacting on public health With an evolutionary perspective as its basis this exciting book provides a framework by which the discipline can finally be coherently explored By looking at what we know of human evolution and disease in relation to the diets that humans enjoy now and prehistorically the book allows the reader to begin to truly understand the link between diet and disease in the Western world and move towards a greater knowledge of what can be defined as the optimal human diet Written by a leading expert Covers all major diseases including cancer heart disease obesity stroke and dementia Details the benefits and risks associated with the Palaeolithic diet Draws conclusions on key topics including sustainable nutrition and the question of healthy eating This important book provides an exciting and useful insight into this fascinating subject area and will be of great interest to nutritionists dietitians and other members of the health professions Evolutionary biologists and anthropologists will also find much of interest within the book All university

and research establishments where nutritional sciences medicine food science and biological sciences are studied and taught should have copies of this title

Western Diseases Tessa M. Pollard, 2008-04-10 As a group western diseases such as type 2 diabetes cardiovascular disease breast cancer allergies and mental health problems constitute one of the major problems facing humans at the beginning of the 21st century particularly as they extend into poorer countries An evolutionary perspective has much to offer standard biomedical understandings of western diseases At the heart of this approach is the notion that human evolution occurred in circumstances very different from the modern affluent western environment and that as a consequence human biology is not adapted to the contemporary western environment Written with an anthropological perspective and aimed at advanced undergraduates and graduates taking courses in the ecology and evolution of disease Tessa Pollard applies and extends this evolutionary perspective by analysing trends in rates of western diseases and providing a new synthesis of current understandings of evolutionary processes and of the biology and epidemiology of disease
