Traces Of Dreams Landscape Cultural Memory And The Poetry Of Basho:

Traces of Dreams Haruo Shirane, 1998 Basho 1644-94 is perhaps the best known Japanese poet in both Japan and the West and this book establishes the ground for badly needed critical discussion of this critical figure by placing the works of Basho and his disciples in the context of broader social change

Traces of Dreams Haruo Shirane, 2022 Basho 1644-94 is perhaps the best known Japanese poet in both Japan and the West and yet there has been remarkably little serious scholarship in English on his achievement This book is intended to address that virtual void by establishing the ground for critical discussion and reading of a central figure in Japanese culture placing the works of Basho and his disciples in the context of broader social change Intended for both the general reader and the specialist *Traces of Dreams* examines the issues of language landscape cultural memory and social practice in early modern Japan through a fundamental reassessment of haikai popular linked verse that eventually gave birth to modern haiku particularly that of Basho and his disciples The author analyzes haikai not only as a specific poetic genre but as a mode of discourse that emerged from the profound engagement between the new commoner culture that came to the fore in the seventeenth century cities and the earlier traditions which haikai parodied transformed and translated into the vernacular *Traces of Dreams* explores the manner in which haikai both appropriated and recast the established cultural and poetic associations embodied in nature historical objects and famous places the landscape that preserved the cultural memory and that became the source of authority as well as the contested ground for haikai re-visioning and re-mapping

Landscape Theory Rachel DeLue, James Elkins, 2010-10-28 Artistic representations of landscape are studied widely in areas ranging from art history to geography to sociology This book brings together more than fifty scholars from many disciplines to establish new ways of thinking about landscape in art

Japanese Poetry and its Publics Dean Anthony Brink, 2017-10-02 This book aims to explore precisely how modern Japanese poetry has remained central to public life in both Japan and its former colony of Taiwan Though classical Japanese poetry has captivated the imagination of Asian studies scholars little research has been conducted to explore its role in public life as a discourse influential in defining both the modern Japanese empire and contemporary postcolonial negotiations of identity This book shows how highly visible poetry in regular newspaper columns and blogs have in various historical situations in Japan and colonial Taiwan contested as well as promoted diverse colonial imaginaries This poetry reflects both contemporary life and traditional poetics with few counterpoints in Western media Methodologically this book offers a defense of the public influence of poetry each chapter enlisting a wide range of social and media theorists from Japan Europe and North America to explore specific historical moments in an original recasting of intertextuality as a vital feature of active inter-evental material engagements In this book rather than recite a standard survey of literary movements and key poets the approach taken is to examine uses of poetry shown not only to support colonialism and imperialism emerging objectionable forms of exploitation as well as the destruction of ecologies including old growth forests in Taiwan

and the Fukushima Disaster but also to present a medium of resistance a minor literature for registering protest forming transnational affiliations and promoting grass roots democracy The book is based on years of research and fieldwork partially in conjunction with the production of a documentary film *Horizons of the Rising Sun Postcolonial Nostalgia and Politics in the Taiwan Tanka Association Today* 2017
