The New and Amazing Guide to American Energy Policy Robert N Henry, 2015-10-22 Most people know that special interests rule Washington D C But in the world of energy it is worse than you can imagine DID YOU KNOW There is a way to run our cars without using gasoline but it is illegal in all 50 states There is a way to destroy OPEC but we caved to the oil companies instead There is a form of nuclear energy that can't melt down and is 200 times more efficient than current technology reactors Did you know we have at least 10 000 years worth of this fuel but that our government treats it as a waste material Do you know we already built such a reactor in the 1960 s and that we gave all our research notes to the Chinese Did you know that with just two nukes the whole country could be destroyed and that Washington is doing nothing about this risk Did you know that fossil fuels have reduced deaths from climate events by 98% in the last 80 years Did you know that increasing CO2 is not a danger to the Earth but is actually greening the planet and helping to feed the world's poor Did you know that if the U S cut its CO2 emissions by 80% now by 2100 we would change the world's temperature by only 0.64 degrees centigrade Did you know that 2014 was not the warmest year in history as we are told but was actually one of the 3% COLDEST years in the last 10 000 years Did you know that despite massive usage petroleum reserves continue to rise Did you know the U S has more coal natural gas and oil than any other place on Earth Did you know that we are rich in key elements that are needed by today's breakthrough technologies including cell phones satellites electronics and national defense but that we have shipped the production of these elements as well as the related jobs to China Well now you know Welcome to THE NEW AND AMAZING GUIDE TO AMERICAN ENERGY POLICY
