STEM Education in Poverty Brantina Chirinda, Gladys Sunzuma, Perkins Muredzi, 2025-07-15 This book is about Science Technology Engineering and Mathematics STEM education in poverty and the lessons we learn from Zimbabwe The world is driving towards the fourth Industrial Revolution 4IR where economic growth has been attributed to STEM education STEM education is vital in this era where both developed and developing countries are undergo rapid changes Globally STEM education has been practised differently in schools and universities University programs new school curricula instructional methods extracurricular programs and professional development programs for in service teachers have been created to cater to STEM subjects STEM education is envisioned to produce critical thinkers inventors creators problem solvers innovators and professionals who will solve the world s ever changing challenges including inequity food insecurity climate change inequality and poverty STEM is essential to modern education Zimbabwe has faced significant economic challenges but has made remarkable strides in STEM education By examining the successes and challenges of STEM education in Zimbabwe we can learn valuable lessons about improving STEM education in underserved communities This book contributes to the international debate surrounding the optimal STEM education for students in underserved schools It incorporates detailed accounts of STEM education in Zimbabwe schools shedding light on the challenges students and educators face in impoverished areas In Zimbabwe STEM education faces significant challenges such as materials and facilities pedagogy policy reform access and relevance Some of the main issues highlighted in this book are the need for more resources including funding teaching materials and adequate laboratories Effective STEM pedagogy is hampered by an education system that emphasises the curriculum and teacher centred focus instead of focusing on how students can be taught or learn Research has shown that in Zimbabwe STEM teachers must apply inventive pedagogies and suitable learner centred STEM teaching approaches As a result there is a need for more STEM related programs and courses in schools and universities to improve the opportunities for students to pursue careers in these fields Another challenge is the need for more

awareness about the opportunities and importance of STEM education and interest in STEM subjects among students which can be attributed to a lack of exposure and understanding of the relevance and importance of these fields in today's world. While lack of resources and other challenges hinder effectiveness, opportunity lies in promising pathways of policy and practice. In Zimbabwe, there is a varying degree of success in the implemented competence-based curriculum which emphasises inquiry-based learning and STEM education. Finally, there is a need for early exposure to STEM-based career opportunities and for more collaboration between the government, private sector and educational institutions to address these challenges and promote STEM education in Zimbabwe. This book uses Zimbabwe as an example to explore STEM education in poverty. By examining the successes and challenges of STEM education in Zimbabwe, this book offers valuable insights into how STEM education can be integrated into the curriculum in countries with developing and emerging economies. This book is an essential resource for anyone interested in improving STEM education in underserved communities.

Ancient and Indigenous Wisdom Traditions in African and Euro-Asian Contexts Ehaab Abdou, Theodore Zervas, 2024-08-01. This book brings attention to the understudied and often overlooked question of how curricula and classroom practices might inadvertently reproduce exclusionary discourses and narratives that omit or negate particular cultures, histories and wisdom traditions. With a focus on representations and classroom practices related especially to ancient and Indigenous wisdom traditions and cultures, it includes unique contributions from scholars studying these questions in various contexts. The book offers a range of important studies from key African and Euro-Asian contexts including Afghanistan, Albania, Greece, Iran, South Africa, Sweden, Türkiye and Zimbabwe. The various chapter contributions address and discuss nuances of each of the contexts under study. The contributions also help highlight some key commonalities across these contexts, including how dominant discourses and various forces have historically shaped and continue to shape and reproduce such omissions, misrepresentations and marginalization. In addition to seeking to reconcile with some of these ancient and Indigenous wisdom traditions and cultures, the book charts a path forward towards more holistic analytical frameworks as well as more inclusive and balanced representations and classroom practices in these aforementioned geographic contexts and beyond. It will appeal to scholars, researchers, undergraduate and graduate students with interests in Indigenous education, curriculum studies, citizenship education, history of education, religion and educational policy.
