WATER LEVEL CONTROLLER

—

ABSTRACT

The level of the water in a field is controlled by this equipment using microcontroller. Main components are PIC microcontroller, motor, sensor etc. The sensors sense the intensity of water and give indication to the microcontroller. The microcontroller produces the control signals to drive the motor. If there is no water then micro-controller gives control signal to start the motor and if there is sufficient water in the field then the microcontroller give control signal to stop the motor.
