The so called 'impasse of development theory' and the alternatives proposed to move beyond it Cynthia Dittmar, 2009-07-20 Seminar paper from the year 2008 in the subject Politics Topic Development Politics grade distinction University of Manchester Institute for Development Policy and Management course Perspectives on Development language English abstract In the mid 1980s development studies experienced a crisis the often called impasse of development theory and policy Schuurmann 1993 The reasons can be found on the level of development thinking and of real world changes and problems Simon 2003 6 Development thinking got stuck in a cul de sac as both grand meta narratives of development theory Modernisation theory and radical Marxist approaches lost their hegemony radical alternative theories based on Marxist and neo Marxist political economy were discredited by the collapse of socialism Modernisation theory based in neoclassical economics did not seem to deliver many benefits as economic growth turned out to produce more ecological social and economical problems than it solved ibid It became clear that growth and the neo liberal agenda with its structural adjustment programs SAP in the 1980s and 1990s was not necessarily connected to other development goals like employment creation reduction of inequality and poverty or the provision of basic needs The acceleration of globalisation and with it the questioning of the nation state as a trusted point of reference Schuurman 2000 7 of development studies intensified the crisis of development theory Moreover new theoretical approaches like feminism post modernism and post colonialism and the growing recognition of heterogeneity of the third world challenged development studies and theory even more Schuurman 1993 There have been two major reactions to the impasse of development theory and policy The first reaction was the search for development alternatives with the intention of reforming and redefining the goals of development The second reaction post development thinking was more radical as it rejects development as a whole However development studies and practice survived the impasse and is back on the agenda a flourishing industry centred on social capital and social development has arisen in the World Bank the UNDP and other multilateral institutions Hart 2001 649 This paper aims to review alternative development section 2 and post development section 3 and analyses which contributions have helped to overcome the impasse
