Theories Of Local Economic Development Perspectives From Across The Disciplines:

Theories of Local Economic Development Richard D. Bingham, Robert Mier, 1993-08-25 Assembling the leading thinkers and practitioners in the field of economic development *Theories of Local Economic Development* places state of the art theoretical positions on such important issues as inner city development rural development technological innovation and rebuilding economic infrastructure To accomplish this task the contributors skillfully incorporate illustrative case material Chapters draw on the disciplines of economics geography regional science urban planning sociology political science and public administration The pivotal assumption behind this book is that research should and can lead to general statements about economic development As a result scholars of economics and public finance public administration political science urban studies policy studies and development studies will appreciate this invaluable resource Bingham and Mier have compiled an interesting study of local economic development in the United States by bringing together a series of papers that review aspects of economic growth from across a range of methodological perspectives The study is to be recommended to anyone wishing to gain a general understanding of current theoretical debate in the United States to economic development and may provide readers with some useful ideas on possible methodological approaches to understanding economic development in Britain *Local Government Studies* The individual contributions are generally sound well written reviews of the various theories relating to their particular subject areas The study is designed to have a common theme of reviewing problems and succeeds in its aim by providing a far more consistent study than many other collections of papers The study is therefore to be recommended to anyone wishing to gain a general understanding of current theoretical debate in the United States and may provide readers with some useful ideas on possible methodological approaches to understanding economic development in Britain *Local Government Studies*

Theories of Local Economic Development James E. Rowe, 2016-12-05 In economic development theory and practice exist as two seemingly separate realities Academics strive to develop or refine theory by drawing on abstract concepts about the way people behave and institutions work while practitioners draw from a stock of experiences By bringing together leading theorists and practitioners such as Blakely Blair McCann Luger Gunder Stough and Stimson this book provides the first comprehensive overview of local economic development theories for over fifteen years It explores the theory behind the key concepts that every economic practitioner must understand and in doing so ties together the various theories from across the disciplines to practice

Handbook of Economic Development Kuo-Tsai Liou, 1998-06-25 Featuring over 1900 references drawings and tables and drawing on disciplines as diverse as political economics public management and urban affairs this versatile text offers comprehensive information on major policy and managerial issues important to local and national economic development Pulling together the work of over 40 researchers the book examines the role of government in economic advances and reform provides a complete up to date survey of the literature on local and national economic development details local and regional economic progress in the US adopts an

innovative interdisciplinary approach to the study of economic expansion and more *The Institutional Foundations of the Digital Economy in the 21st Century* Elena G. Popkova, Artem Krivtsov, Aleksei V. Bogoviz, 2021-02-08 The development of the Digital Economy has been a landmark breakthrough for economic systems in the 21st century as it opens up opportunities for the full scale implementation of new digital technologies and the optimization of economic activities While the conceptual essence and specific features of the digital economy are described in detail in the existing literature the practical foundations of its formation are poorly studied In this book the digital economy is studied from the perspective of neo institutional economic theory This allows for the tracking of the process of formation institutionalization of the digital economy determining the basic institutions that are necessary for its formation and that exist in modern economic practice and analyzing scenarios for the future development of the digital economy in the 21st century **Regional Economic**

Development Robert J. Stimson, Roger R. Stough, Brian H. Roberts, 2013-03-09 Regional economic development has attracted the interest of economists geographers planners and regional scientists for a long time And of course it is a field that has developed a large practitioner cohort in government and business agencies from the national down to the state and local levels In planning for cities and regions both large and small economic development issues now tend to be integrated into strategic planning processes For at least the last 50 years scholars from various disciplines have theorised about the nature of regional economic development developing a range of models seeking to explain the process of regional economic development and why it is that regions vary so much in their economic structure and performance and how these aspects of a region can change dramatically over time Regional scientists in particular have developed a comprehensive tool kit of methodologies to measure and monitor regional economic characteristics such as industry sectors employment income value of production investment and the like using both quantitative and qualitative methods of analysis and focusing on both static and dynamic analysis The father of regional science Walter Isard was the first to put together a comprehensive volume on techniques of regional analysis Isard 1960 and since then a huge literature has emerged including the many titles in the series published by Springer in which this book is published **Entrepreneurship and Community Economic**

Development Monica C. Diochon, 2004-05 An exploration of the factors that influence a community's effectiveness in fostering entrepreneurship innovation and economic development **The Economic Viability of Micropolitan America** Gerald L. Gordon, 2013-12-07 As the global recession of 2008 and beyond took hold of the American economy smaller markets were disproportionately affected by job losses as well as the resultant brain drains tax base reductions diminished housing values and diminishment of their overall quality of life So it is not surprising that these smaller markets face unique challenges **The Formula for Economic Growth on Main Street America** Gerald L. Gordon, 2009-07-29 The community that establishes and maintains a solid economic framework greatly improves its chances of sustaining itself through fluctuations in the economy The question is of course how can city officials and administrators make this happen The

Formula for Economic Growth on Main Street America examines why economic growth during the late two

Decentralized Development in Latin America Paul Lindert, Otto Verkoren, 2010-03-02 Much of the scholarly and professional literature on development focuses either on the macro level of national policies and politics or on the micro level of development projects and household or community socio economic dynamics By contrast this collection pitches itself at the meso level with a comparative exploration of the ways in which local institutions municipalities local governments city authorities civil society networks and others have demanded and taken on a greater role in planning and managing development in the Latin American region The book's rich empirical studies reveal that local institutions have engaged upwards with central authorities to shape their policy and resource environments and in turn been pressured from below by local actors contesting the ways in which the structures and processes of local governance are framed The examples covered in this volume range from global cities such as Mexico and Santiago to remote rural areas of the Bolivian and Brazilian Amazon As a result the book provides a deep understanding of the diversity and complexity of local governance and local development in Latin America while avoiding the stereotyped claims about the impact of globalisation or the potential benefits of decentralisation as frequently stated in less empirically grounded analysis Urban Affairs Caroline

Andrew, Katherine A. Graham, Susan D. Phillips, 2002 Issues of urban policy are increasingly complex and important Whether considered from a social demographic or economic perspective Canada is overwhelmingly an urban nation and healthy prosperous cities are the key to its well being What then is our national policy toward urban affairs In Urban Affairs leading experts in a variety of disciplines explore this question Canada's last experience with national urban policy making was in the 1970s The authors focus on what has happened since exploring how both city regions and ideas about the urban policy making process have changed The authors also examine both the past and present roles of the federal government and what it can and should do in the future Contributors include Caroline Andrew Paul Born Tamarack Institute for Community Engagement Cambridge Kenneth Cameron FCIP Policy and Planning Greater Vancouver Regional District W Michael Fenn Ontario Deputy Minister of Municipal Affairs and Housing Pierre Filion University of Waterloo Katherine Graham Pierre Hamel Universit de Montr al Christopher Leo University of Winnipeg Barbara Levine World University Service of Canada Sherilyn MacGregor PhD Environmental Studies York University Warren Magnusson University of Victoria Beth Moore Milroy Ryerson University Merle Nicholds former Mayor of Kanata Evelyn Peters University of Saskatchewan Susan Phillips Valerie Preston York University Andrew Sancton University of Western Ontario Lisa Shaw Canadian Centre for Policy Alternatives Enid Slack Enid Slack Consulting Inc Sherri Torjman Caledon Institute of Social Policy Carolyn Whitzman doctoral candidate School of Geography and Geology McMaster University David Wolfe University of Toronto and Madeleine Wong University of Wisconsin *Economic Ethics & the Black Church* Wylin D. Wilson, 2017-09-07 This book examines the relationship between race religion and economics within the black church The book features unheard voices of individuals

experiencing economic deprivation and the faith communities who serve as their refuge Thus this project examines the economic ethics of black churches in the rural South whose congregants and broader communities have long struggled amidst persistent poverty Through a case study of communities in Alabama s Black Belt this book argues that if the economic ethic of the Black Church remains accommodationist it will continue to become increasingly irrelevant to communities that experience persistent poverty Despite its historic role in combatting racial oppression and social injustice the Church has also perpetuated ideologies that uncritically justify unjust social structures Wilson shows how the Church can shift the conversation and reality of poverty by moving from a legacy of accommodationism and toward a legacy of empowering liberating economic ethics

Planning Sustainable Cities and Regions Karen Chapple,2014-09-15 As global warming advances regions around the world are engaging in revolutionary sustainability planning but with social equity as an afterthought California is at the cutting edge of this movement not only because its regulations actively reduce greenhouse gas emissions but also because its pioneering environmental regulation market innovation and Left Coast politics show how to blend the three Es of sustainability environment economy and equity Planning Sustainable Cities and Regions is the first book to explain what this grand experiment tells us about the most just path moving forward for cities and regions across the globe The book offers chapters about neighbourhoods the economy and poverty using stories from practice to help solve puzzles posed by academic research Based on the most recent demographic and economic trends it overturns conventional ideas about how to build more livable places and vibrant economies that offer opportunity to all This thought provoking book provides a framework to deal with the new inequities created by the movement for more livable and expensive cities so that our best plans for sustainability are promoting more equitable development as well This book will appeal to students of urban studies urban planning and sustainability as well as policymakers planning practitioners and sustainability advocates around the world

OECD Regional Development Studies Regional Competitiveness and Skills OECD,1997-12-12 Regional policies are increasingly focusing on human resources and their orientation towards market demand and improvement of partnerships This volume casts a new light on these issues providing a useful source of information and inspiration for regional actors and

their national partners **Handbook of Administrative Communication** James Garnett, 2024-11-01 This volume takes a communications oriented approach to a wide range of topics encompassing organization management political theory and practice business government relations innovation processes and IT Offering a balanced international presentation it contains authoritative contributions from world renowned experts representing various disciplines including administrative law organizational and political theory phenomenology public and business management educational technology psychology and other fields The book addresses typically neglected subjects such as communicating through humor drama film poetry fiction and other creative forms

Reinventing Local and Regional Economies Gerald L. Gordon, 2011-09-26 Recent US economic history is rife with examples of cities and regions that have experienced significant decline Many of those localities began to slide after decades even generations of feeling immune to economic disaster Boeing and Kodak the steel industry in Pittsburg and the automotive industry in Detroit all expected to make it golden into the distant future Tapping into the available body of knowledge as well as through nearly 70 interviews the experiences of those who lived and worked in those times in cities around the United States to identify the most effective strategies Reinventing Local and Regional Economies delineates the dos and don'ts to observe in order to sustain economic vitality in any community Written by Dr Gerald Gordon president and chief executive officer of the Economic Development Authority in Fairfax County Virginia the book explores lessons learned and examines the messages communities must be mindful of in order to ensure future economic stability Drawing on more than 30 years of experience Gordon identifies a set of foundational lessons that while they are not guarantees of success certainly portend failure if ignored by local planners Each chapter explores a different prerequisite and then applies it to several case studies of the reinvention of local and regional economies Each of these basic components of economic growth will then be examined against the backgrounds of the many communities studied thus permitting comparisons and contrasts to be drawn A comparative analysis of results from one community to another across a wide range of case studies this book puts into clear context the observations about what works not only in one locale but in communities with common features facing common issues and getting similar results Using case studies and real world examples of successes and failures Dr Gordon provides the tools to develop a proactive strategy that positions your community for surviving and thriving regardless of external stresses and adverse economic conditions that may be out of your control

 '*Whither regional studies?*' Andy Pike, 2013-09-13 Regional studies are at a vibrant juncture Regions continue to provide a conceptual and analytical focus for often overlapping concerns with economic social political cultural and ecological change In the context of increased interest in inter and multi disciplinary approaches regions remain an arena in which synthesis across disciplines economics geography planning politics and sociology can take place Yet recent work has raised fundamental questions about how we think about and research regions and regional change development governance and regulation First emergent conceptual ideas have introduced new thinking about space place and scale that interprets

regions as unbounded relational spaces This work has disturbed notions of regions as bounded territories and questioned hierarchical systems of scale through more complex multi scalar approaches Second research methodology has grown in sophistication and sensitivity but remains somewhat polarised between the binaries of positivist often quantitative and more theoretically diverse typically qualitative approaches Last regional governance policy and politics are wrestling with the conceptual methodological and political complexities of new modes and geographies of governance and emergent multi agent and multi level institutional architectures This book brings together important voices in regional studies to contribute to and reflect upon these current issues and debates While we are at an early stage in beginning to think through what such conceptual theoretical methodological governance policy and political innovations and developments mean for regional studies the magnitude and resonance of such issues underpin the vitality of research on the region This book was published as a special issue of Regional Studies
