Theory And Practice Of Excise Taxation Smoking Drinking Gambling Polluting And Driving:

Theory and Practice of Excise Taxation Sijbren Cnossen, 2005-02-03 Excise taxes on smoking drinking gambling polluting and driving are always topical and controversial Not only are these taxes convenient sources of government revenue they can also be designed to reflect the external costs that consumers or producers of excisable products impose on other people Global warming acid rain traffic congestion and the economic costs of cigarette and alcohol consumption are problems that can be corrected through selective excise taxes and other regulatory instruments Excise taxes moreover are increasingly looked upon as revenue substitutes for distortionary taxes on capital and labour Addressing these and other issues this book by internationally recognized experts analyses the art of excise taxation providing a systematic insightful and often provocative treatment of a major fiscal instrument that policy makers often neglect and that gets little attention in the professional literature It provides a sound understanding not only of relevant economic theory but of the myriad institutional details that are crucial for the practical application of that theory *Theory and Practice of Excise Taxation* Sijbren Cnossen, 2005-02-03 Excise taxes are not only convenient sources of government revenue they can also be designed to reflect the external costs of excisable products such as global warming acid rain traffic congestion and the costs of cigarette and alcohol consumption This book by internationally recognized experts analyses the art of excise taxation providing a systematic insightful and often provocative treatment of a major fiscal instrument that policy makers often neglect and that gets little attention in the professional literature **Modernizing VATs in Africa** Sijbren Cnossen, 2019-07-16 Most African countries are in dire need of more tax revenue In 28 out of 45 countries with a value added tax VAT total tax revenue as a percentage of GDP is around 15% or less falling short of what is necessary to finance basic human and economic development Far from being revenue raising instruments current African VATs are riddled with exemptions exclusions and zero rates on domestic goods and services that depress revenue are highly distortionary and greatly complicate the administration of VAT Modernizing VATs in Africa enables policymakers professionals and students to analyse African tax systems to ascertain how they can be modernized It explains the case for VAT base broadening over rate increasing arguing that exemptions and zero rates mainly accrue benefits for higher income groups Even more persuasively it demonstrates that the net result of fiscal systems can be equalizing if the revenue of broad based VATs is used to finance in kind transfers such as healthcare and education VAT modernization should be used to enable governments to finance development Modernizing VATs in Africa puts a compelling case forward for how and why this can be achieved *Alcohol: No Ordinary Commodity* Thomas F. Babor, Sally Casswell, Kathryn Graham, Taisia Huckle, Michael Livingston, Esa Österberg, Jürgen Rehm, Robin Room, Ingeborg Rossow, Bundit Sornpaisarn, 2022-10-31 Alcohol No Ordinary Commodity is a collaborative effort by an international group of addiction scientists to improve the linkages between addiction science and alcohol policy It presents in a comprehensive practical and readily accessible form the accumulated scientific knowledge on alcohol research that has a

Off the Street W.A. Bogart,2016-11-12 An unflinching analysis of one of the major issues of our time the shift from criminalization to regulation of recreational drugs The war on drugs has failed The cost of trying to control the production sale and use of recreational drugs through the criminal law is too high unjust incarceration illicit markets tainted substances exploited children and an untaxed industry But there is an alternative The watchwords for governments controlling the consumption of alcohol tobacco junk food and gambling are permit but discourage All are legal but harmful consumption is decreased by targeted regulatory strategies That same approach should be adopted for drugs Legalization and regulation can attack the underground economy drive down excessive use provide revenue for prevention treatment and counselling and better protect children Off the Street Legalizing Drugs calls for a thoughtful national discussion of the legalization and regulation of recreational drugs the least bad way forward *Permit But Discourage* William A. Tax Reform Mr.Dirk Heine,Mr.John Norregaard,Ian W.H. Parry,2012-07-01 This paper recommends a system of upstream taxes on fossil fuels combined with refunds for downstream emissions capture to reduce carbon and local pollution emissions Motor fuel taxes should also account for congestion and other externalities associated with vehicle use at least until mileage based taxes are widely introduced An examination of existing energy environmental tax systems in Germany Sweden Turkey and Vietnam suggests that there is substantial scope for policy reform This includes harmonizing taxes for pollution content across different fuels and end users better aligning tax rates with values for externalities and scaling back taxes on vehicle ownership and electricity use that are redundant on environmental grounds in the presence of more targeted taxes
