Education Evaluation Celina Del Felice, Aaron Karako, Andria Wisler, 2015-05-01 Practice and research of peace education has grown in the recent years as shown by a steadily increasing number of publications programs events and funding mechanisms The oft cited point of departure for the peace education community is the belief in education as a valuable tool for decreasing the use of violence in conflict and for building cultures of positive peace hallmarked by just and equitable structures Educators and organizations implementing peace education activities and programming however often lack the tools and capacities for evaluation and thus pay scant regard to this step in program management Reasons for this inattention are related to the perceived urgency to prioritize new and more action in the context of scarce financial and human resources notwithstanding violence or conflict the lack of skills and time to indulge in a thorough evaluative strategy and the absence of institutional incentives and support Evaluation is often demand driven by donors who emphasize accounting given the current context of international development assistance and budget cuts Program evaluation is considered an added burden to already over tasked programmers who are unaware of the incentives and of assessment techniques Peace education practitioners are typically faced with forcing evaluation frameworks techniques and norms standardized for traditional education programs and venues Together these conditions create an unfavorable environment in which evaluation becomes under valued de prioritized and mythologized for its laboriousness This volume serves three inter related objectives First it offers a critical reflection on theoretical and methodological issues regarding evaluation applied to peace education interventions and programming The overarching questions of the nature of peace and the principles guiding peace education as well as governing theories and assumptions of change transformation and complexity are explored

Second the volume investigates existing quantitative qualitative and mixed methods evaluation practices of peace educators in order to identify what needs related to evaluation persist among practitioners Promising practices are presented from peace education programming in different settings formal and non formal education within various groups e g children youth police journalists and among diverse cultural contexts Finally the volume proposes ideas of evaluation novel techniques for experimentation and creative adaptation of tools from related fields in order to offer pragmatic and philosophical substance to peace educators next moves and inspire the agenda for continued exploration and innovation The authors come from variety of fields including education peace and conflict studies educational evaluation development studies comparative education economics and psychology *Peace Education, 3d ed.* Ian M. Harris, Mary Lee Morrison, 2012-12-13 Now in its third edition Peace Education provides a comprehensive approach to educating for a just and sustainable future It begins with religious and historical trends that have molded our understanding of peace and then presents a variety of ways to practice peace education in schools and communities and explains how it can motivate students The teaching and practice of peace education provides a basis of valuable knowledge about resolving conflicts and transforming violence without the use of force Instructors considering this book for use in a course may request an examination copy here *Peace Education from the Grassroots* Ian Harris, 2013-09-01 Historians often ignore the day to day struggles of ordinary people to improve their lives They tend to focus on the accomplishments of illustrious leaders Peace Education from the Grassroots tells the stories of concerned citizens teachers and grassroots peace activists who have struggled to counteract high levels of violence by teaching about the sources for violence and strategies for peace The stories told here come from the grass roots meaning the educators are close to the forms of violence they are addressing This collection of essays tells how citizens at the grassroots level developed peace education initiatives in thirteen different nations Belgium Canada El Salvador Germany India Jamaica Japan Mexico the Philippines South Korea Spain Uganda and the United States A fourteenth article describes the efforts of the International Red Cross to implement a human rights curriculum to teachers on the ground in the Balkans Iran Senegal and the United States These chapters describe a variety of schools colleges peace movement organizations community based organizations and international nongovernmental organizations engaged in peace education *Lessons for Creating a Culture of Character and Peace in Your Classroom* Edward F.
