*Modern Mobile Technologies and their Impact on Content Providers* Emanuel Hanser-Strecker,2006-06-20 Master s Thesis from the year 2006 in the subject Communications Multimedia Internet New Technologies grade very good Asian Insitute of Technology language English abstract The acceleration of technological developments in wireless networks up to 3G and beyond as well as in the production of multi purpose handsets has given rise to a large variety of content offerings As

a consequence content providers deployed continuous efforts to enhance their services by multi media features in Commerce and wireless Web related applications In order to consolidate indications resulting from theoretical research a survey has been conducted in view of assessing future development prospects in the area of content services The relevant impact on content providers has been defined in terms of competition challenges threats and opportunities Under this latter aspect it seems to be established that the digital divide is shrinking at least in the field of mobile communications In an outlook patent based innovation trends in tele communications are outlined as well as technological developments expected in mobile network configurations and handset specifications as related to specific forms of content The economic prospects for the mobile players namely content providers seem to be more interesting in certain areas than in others the consumer demand being largely driven by technology readiness which could lead to impressive shifts within the global market

**Proceedings**,2003 Wireless Communications in the 21st Century Mansoor Shafi,Shigeaki Ogose,Takeshi Hattori,2002-03-19 The rapid leaps in communications technology spearheaded by the growth of the wireless industry have meant the 21st century will be a milestone for communications technology This volume collects articles from communications experts Impact of the UMTS Experience for Forthcoming Network Generations Claudius Benedikt Hildebrand,2003-12-05 Seminar paper from the year 2003 in the subject Computer Science Commercial Information Technology grade 1 7 A European Business School International University Schlo Reichartshausen Oestrich Winkel Department of Information Systems course Seminar 7th Semester language English abstract This paper evaluates the impact of the UMTS experience for forthcoming network generations Therefore it is necessary to show the development of mobile networks from the beginning on During the evolution process formerly analogue networks transformed to digital ones with more and more services that added value to customers life and consequently became very popular In these days mobile operators are trying to migrate their second generation networks to third generation which was supposed to be a globally accepted standard offering high data transfer speeds However an in depth look at the technical and financial background of the 3G implementation shows that provider promises and user expectations differ This will not only affect 3G but also upcoming network generations like 4G In the following continuous delays in the 3G launch and advanced research in 4G technology in combination with upgrades to existing 2G network infrastructure are discovered as threads questioning the success of 3G
