The Year Without Summer Tracing A D 536 And Its Aftermath:

The Years Without Summer Joel Gunn, 2000 Tree rings worldwide and other evidence record an almost catastrophic change in the environment during the middle years of the 6th century AD **Surviving Sudden Environmental Change** Jago Cooper, Payson Sheets, 2012-02-01 Archaeologists have long encountered evidence of natural disasters through excavation and stratigraphy In *Surviving Sudden Environmental Change* case studies examine how eight different past human communities ranging from Arctic to equatorial regions from tropical rainforests to desert interiors and from deep prehistory to living memory faced and coped with such dangers Many disasters originate from a force of nature such as an earthquake cyclone tsunami volcanic eruption drought or flood But that is only half of the story decisions of people and their particular cultural lifeways are the rest Sociocultural factors are essential in understanding risk impact resilience reactions and recoveries from massive sudden environmental changes By using deep time perspectives provided by interdisciplinary approaches this book provides a rich temporal background to the human experience of environmental hazards and disasters In addition each chapter is followed by an abstract summarizing the important implications for today's management practices and providing recommendations for policy makers Publication supported in part by the National Science Foundation

Environment and Society in the Long Late Antiquity, 2019-01-04 *Environment and Society in the Long Late Antiquity* brings together scientific archaeological and historical evidence on the interplay of social change and environmental phenomena at the end of Antiquity and the dawn of the Middle Ages covering the period ca 300-800 AD It gives a new impetus to the study of the environmental history of this crucial period of transition between two major epochs in premodern history The volume contains both systematic overviews of the previous scholarship and available data as well as a number of interdisciplinary case studies It covers a wide range of topics including the histories of landscape climate disease and earthquakes all intertwined with social cultural economic and political developments Contributors are Daniel Abel Schaad Francesca Alba Sánchez Flavio Anselmetti Jos Antonio López Sánchez Daniel Ariztegui Brunhilda Brushulli Yolanda Carrión Marco Alexandra Chavarría Petra Dark Carmen Fernández Ochoa Martín Finn Asuunta Florenzano Ralph Fyfe Didier Galop Benjamin Graham John Haldon Kyle Harper Richard Hodges Adam Izdebski Katarina Kouli Inga Labuhn Tamara Lewit Anna Maria Mercuri Alessia Masi Lucas McMahon Lee Mordechai Mario Morellón Timothy Newfield Almudena Orejas Saco del Valle Leonor Peña Chocarro Sebastián Pérez Díaz Eleonora Regattieri Stephen Rippon Neil Roberts Laura Sadori Abigail Sargent Gaia Sinopoli Paolo Squatriti Giovanni Stranieri Raymond van Dam Bernd Wagner Mark Whittow Penelope Wilson Jessie Woodbridge See inside the book The Great Maya Droughts in Cultural Context Gyles Iannone, 2014-03-15 In *The Great Maya Droughts in Cultural Context* contributors reject the popularized link between societal collapse and drought in Maya civilization arguing that a series of periodic collapses including the infamous Terminal Classic collapse AD 750-1050 were not caused solely by climate change related droughts but by a combination of other social political and environmental

factors New and senior scholars of archaeology and environmental science explore the timing and intensity of droughts and provide a nuanced understanding of socio ecological dynamics with specific reference to what makes communities resilient or vulnerable when faced with environmental change Contributors recognize the existence of four droughts that correlate with periods of demographic and political decline and identify a variety of concurrent political and social issues They argue that these primary underlying factors were exacerbated by drought conditions and ultimately led to societal transitions that were by no means uniform across various sites and subregions They also deconstruct the concept of collapse itself although the line of Maya kings ended with the Terminal Classic collapse the Maya people and their civilization survived The Great Maya Droughts in Cultural Context offers new insights into the complicated series of events that impacted the decline of Maya civilization This significant contribution to our increasingly comprehensive understanding of ancient Maya culture will be of interest to students and scholars of archaeology anthropology geography and environmental studies

Cold Tyranny and the Demonic North of Early Modern England Anne Cotterill, 2025-10-01 The seventeenth and early eighteenth centuries were among the worst years of the Little Ice Age This volume attends to English texts from this period to trace associations between wintry physical landscapes and an icy inner landscape of human cruelty and tyranny whose rigors promote the ultimate chill of rigor mortis Sailors seeking a polar route to the East brought terrifying reports of northern icescapes long popularly linked with the devil Simultaneously concerns about increasingly cold winters at home in Britain overlapped with increased scrutiny of kingship and the church and fear of tyranny from both Such fears were reflected in ongoing struggles between king and Parliament during the period leading to revolution and war The binding power of ice and the power of northern winters to deface kill and bury life suggested the Fall as human parallel to winter cold hearted humans as tyrannical winters who deal in death

from as well as its place in the larger human narrative

Hospitals and Healing from Antiquity to the Later Middle

Ages Peregrine Horden, 2023-05-31 The first part of this collection brings together a selection of Peregrine Horden's papers on the history of hospitals and related institutions of welfare provision from their origins in Late Antiquity to their medieval flourishing in Byzantium and the Islamic lands as well as in western Europe. The hospital is seen in a variety of original contexts from demography and family history to the history of music and the liturgy. The second part turns to the history of healing and medicine outside the hospital as well as within it. These studies cover a period from Hippocratic times to the Renaissance but with a particular focus on the Mediterranean region: Byzantine, Middle Eastern and Western in the Middle Ages.

The Oxford Handbook of Late Antiquity Scott Fitzgerald Johnson, 2015-11 The Oxford Handbook of Late Antiquity offers an innovative overview of a period c. 300-700 CE that has become increasingly central to scholarly debates over the history of western and Middle Eastern civilizations. This volume covers such pivotal events as the fall of Rome, the rise of Christianity, the origins of Islam, and the early formation of Byzantium and the European Middle Ages. These events are set in the context of widespread literary, artistic, cultural, and religious change during the period. The geographical scope of this Handbook is unparalleled among comparable surveys of Late Antiquity: Arabia, Egypt, Central Asia, and the Balkans all receive dedicated treatments, while the scope extends to the western kingdoms and North Africa in the West. Furthermore, from economic theory and slavery to Greek and Latin poetry, Syriac and Coptic literature, sites of religious devotion, and many others, this Handbook covers a wide range of topics that will appeal to scholars from a diverse array of disciplines. The Oxford Handbook of Late Antiquity engages the perennially valuable questions about the end of the ancient world and the beginning of the medieval while providing a much-needed touchstone for the study of Late Antiquity itself.

Water on Sand Alan Mikhail, 2013-01-10 Making environmental history accessible to scholars of the Middle East and the history of the region accessible to environmental historians, *Water on Sand* opens up new fields of scholarly inquiry.

In God's Path Robert G. Hoyland, 2015 A groundbreaking work that delivers a fresh account of the Arab conquests, incorporating the latest research in Late Antique history.

The Archaeology of Tribal Societies William A. Parkinson, 2002-03-01 Anthropological archaeologists have long attempted to develop models that will let them better understand the evolution of human social organization. In our search to understand how chiefdoms and states evolve and how those societies differ from egalitarian bands, we have neglected to develop models that will aid the understanding of the wide range of variability that exists between them. This volume attempts to fill this gap by exploring social organization in tribal or autonomous village societies from several different ethnographic, ethnohistoric, and archaeological contexts: from the Pre-Pottery Neolithic Period in the Near East to the contemporary Jivaro of Amazonia.
