The Yokohama Project:

The Yokohama Project Albert Ferré, Tomoko Sakamoto, Michael Kubo, 2002 The Yokohama Project An interesting building usually has an equally interesting tale to tell an epic embedded in the organization of the massive complex amount of matter used to create the structure This book recounts the story of the Yokokama Project an inventive undulating grass covered ferry terminal that was never meant to be built Asked to produce some material for an architectural journal London based architects Farshid Moussavi and Alejandro Zaera Polo of FOA Foreign Office Architects set themselves a program of entering three competitions through which to explore design ideas they had become interested in When they actually won the second competition for the Yokohama International Port Terminal in Yokohama Japan their plans suddenly changed The Yokohama Project presents a textual and visual replica of the way their winning building was developed over eight years by FOA and a huge team of engineers and researchers in Tokyo and Yokohama Unlike the typical architectural book this one offers no critical texts and no theoretical analyses of the structure instead it aims to rediscover the linearity of the building s creation The reader is thus moved linearly through the following chapters Design Evolution Building Permits Structure Services Finishes Circulation and Final Documents Peppered throughout with detailed plans elevations diagrams and sketches as well as candid snapshots of the design team at work sometimes asleep at and under their desks The Yokohama Project is not only an homage to a building but to the many people who worked on making it real Foreign Office Architects is a pioneering architectural practice founded in London in 1992 It has since expanded to include an office in Japan The principal partners are Farshid Moussavi and Alejandro Zaera Polo both of whom are graduates of Harvard University s Masters in Architecture program and former employees of Rem Koolhaas s OMA Office for Metropolitan Architecture Current projects include a publishing headquarters in Paju City Korea and a park and open air auditorium in Barcelona Spain Completed projects include New Belgo restaurant and Bermondsey Antiques Market in London This past year FOA were among the short listed winners for the competition to design Porto Antico in Genova Italy **The Yokohama Project** ,2002

The Smart City and the Co-creation of Value Nobuyuki Tokoro, 2015-11-11 The original point that differentiates this text from otherwise similar texts is that it looks at the building of smart cities from the viewpoint of an interchange of knowledge among companies in different industries or Ba as shared context in motion and emphasizes that the resulting value becomes a source of new corporate competitive advantage In recent years numerous publications have appeared that analyze smart cities from various perspectives including urban planning and administration network theory and innovation However few are academic texts that approach the subject from the viewpoint of corporate competitive advantage against a theoretical background in management studies as this one does This book is the first full scale academic work to analyze smart cities from the viewpoint of corporate competitive advantage Research into corporate competitive advantage includes the positioning and the resource based views with the former focusing on companies external environment and the latter on

their internal resources Although these theories foci of attention necessarily differ they both developed as tools for analyzing companies relative merits and their chances of succeeding in the marketplace and they take the common premise that competitive advantage is built through competition among companies In contrast this book sees corporate competitive advantage as arising not through competition but through co creation among companies It differs in its approach from existing theories in thinking that emphasizing co creation over competition enables an analysis that better describes actual conditions when considering smart cities and corporate competitive advantage Put another way when new values arise from attempts to exchange and fuse knowledge expertise and other factors at the ba where companies from different industries collaborate these values are surely brought about through co creation among companies Another point regarding this book s original perspective on competitive advantage is its emphasis on the relationship between the creation of social value and competitive advantage The question of the extent to which socially useful values can be created in the markets of the 21st century is closely linked to corporate competitive advantage The issues of building smart cities and corporate competitive advantage are themes that this perspective can firmly grasp This book intends to take up three different projects from among the smart city building developments taking shape in Japan and undertake case studies based on the theoretical framework outlined above The central themes will analyze the mechanism of co creation among companies and the relationship of created value to competitive advantage This analysis aims to demonstrate one model relating to corporate competitive advantage in the 21st century

The New Architectural Pragmatism William S. Saunders, 2007 In response to the contentious process surrounding the selection of a design for the World Trade Center site the use of spectacular buildings to brand cities and institutions and the dizzying transformations of the skylines of Shanghai and Dubai public awareness of architecture and design has perhaps never been higher At the same time architecture itself is undergoing an identity crisis as it confronts fundamental issues the effect of digital technology on design the pervasive impact of global capitalism and whether to embrace or resist popular media and taste The New Architectural Pragmatism collects the most provocative penetrating and influential attempts by leading theorists and practitioners in the field to define what architectural practice should be at the beginning of the twenty first century Written in the aftermath of modernism s utopian impulse and postmodernism s detached playfulness the essays gathered here express and critique a new spirit of cultural and political engagement with contemporary society Interrogating the architect s social responsibility the contributors deliberate about how much we should ask of architecture and suggest that in the coming century architecture must be at once flexible and robust responsive and self directed Contributors Stan Allen George Baird Lucy Bullivant James Corner Hal Foster Kenneth Frampton K Michael Hays Dave Hickey Robert Levit Evonne Levy Reinhold Martin Jorge Silvetti Robert Somol Philippe Starck Roemer van Toorn Sarah Whiting Alejandro Zaera Polo William S Saunders is editor of Harvard Design Magazine and assistant dean for external relations at Harvard University s Graduate School of Design He is the editor of four previous

Harvard Design Magazine Readers published by Minnesota Japan's Environmental Politics and Governance Yasuo Takao, 2016-11-03 Environmental issues stretch across scales of geographic space and require action at multiple levels of jurisdiction including the individual level community level national level and global level Much of the scholarly work surrounding new approaches to environmental governance tends to overlook the role of sub national governments but this study examines the potential of sub national participation to make policy choices which are congruent with global strategies and national mandates This book investigates the emerging actors and new channels of Japan s environmental governance which has been taking shape within an increasingly globalized international system By analysing this important new phenomenon it sheds light on the changing nature of Japan s environmental policy and politics and shows how the links between global strategies national mandates and local action serve as an influential factor in Japan s changing structures of environmental governance Further it demonstrates that decision making competencies are shared between actors operating at different levels and in new spheres of authority resulting from collaboration between state and non state actors It highlights a number of the problems challenges and critiques of the actors in environmental governance as well as raising new empirical and theoretical puzzles for the future study of governance over environmental and global issues Finally it concludes that changes in the tiers and new spheres of authority are leading the nation towards an environmentally stable future positioned within socio economic and political constraints Demonstrating that bridging policy gaps between local action national policy and global strategies is potentially a way of reinventing environmental policy this book will be of interest to students and scholars of Environmental Studies Environmental Politics and Japanese Politics Blue Carbon in Shallow Coastal Ecosystems Tomohiro Kuwae, Masakazu Hori, 2018-09-03 This book presents a comprehensive and innovative understanding of the role of shallow coastal ecosystems in carbon cycling particularly marine carbon sequestration Incorporating a series of forward looking chapters the book combines thorough reviews of the global literature and regional assessments mainly around the Indo Pacific region and Japan with global perspectives to provide a thorough assessment of carbon cycling in shallow coastal systems It advocates the expansion of blue carbon ecosystems mangroves seagrass meadows and salt marshes into macroalgal beds tidal flats coral reefs and urbanized shallow waters demonstrating the potential of these ecosystems as new carbon sinks Moreover it discusses not only topics that are currently the focus of blue carbon studies i e sedimentary carbon stock and accumulation rate but also CO₂ gas exchange between the atmosphere and shallow coastal ecosystems carbon storage in the water column as refractory organic carbon and off site carbon storage Including highly original contributions this comprehensive work inspires research beyond the specific regions covered by the chapters The suite of new concepts and approaches is refreshing and demonstrates that blue carbon research is indeed a vibrant new field of research providing deep insights into neglected aspects of carbon cycling in the marine environment At the same time the book provides guidance for policy makers to deliver benefits to society for example the inclusion of blue

carbon as a carbon offset scheme or the Nationally Determined Contribution NDC in the Paris Agreement and also for building resilience in coastal socio ecosystems through better management This book is intended for all those interested in the science and management of coastal ecosystems **Smart Cities and Japan's Energy Transition** Maciej M.

Sokołowski,Fumio Shimpō,2025-03-31 This book offers a complex and problem based analysis of the past present and future of smart cities in Japan s energy transition With 92% of Japanese living in urban areas and a goal of achieving net zero greenhouse gas emissions by 2050 Japan s energy future will depend largely on how its cities can become smarter greener and more resilient To reach these ambitions a collective effort is required with actions coming from Tokyo to Kumamoto from Yokohama to Sapporo and throughout dozens of smaller and bigger Japanese urban structures This book addresses the key issues that have emerged or may emerge in various Japanese cities that are pursuing smart energy initiatives The authors examine several issues including international cooperation heating decarbonisation foreign direct investments city planning housing policies and technology related risks in the context of Japan s energy transition Drawing on case studies from different regions of Japan and sectors of Japanese economy significant for reaching carbon neutrality this book will be a valuable resource for all interested in energy transition climate action and smart cities where Japan and Japanese smart cities serve as excellent benchmarks Emerging Urbanity Richard Marshall,2013-09-05 Discussions on the global economy

focus on the hyper mobility of capital the possibility of instantaneous transmission of information and money around the globe the centrality of information outputs to our economic systems and emphasise the neutralisation of geography and of places What is ignored however is that even the most advanced information industries need a material infrastructure of buildings and work processes and considerable agglomeration in order to operate in global markets Further the globalisation of economic activity has brought with it not only a vast dispersal of offices and factories but also a growing importance of central functions to manage and coordinate such worldwide networks of activities The development of global urban projects is one manifestation of this move towards centrality in urban situations These large scale urban projects are the result of governments seeking competitive advantage in the global economy They are critical components of a nation s global infrastructure In the booming economies of the Asia Pacific Rim prior to the Asian Economic Crisis these urban developments were seen as key components of national economic policies In their making they require a conscious effort to arrange material infrastructure and reinforce that there is a role for urban design in this making Emerging Urbanity is an exploration of this role in nine global urban projects in the Asia Pacific Rim **Smart Grid Standards** Takuro Sato,Daniel M.

Kammen,Bin Duan,Martin Macuha,Zhenyu Zhou,Jun Wu,Muhammad Tariq,Solomon Abebe Asfaw,2015-02-02 A fully comprehensive introduction to smart grid standards and their applications for developers consumers and service providers The critical role of standards for smart grid has already been realized by world wide governments and industrial organizations There are hundreds of standards for Smart Grid which have been developed in parallel by different

organizations It is therefore necessary to arrange those standards in such a way that it is easier for readers to easily understand and select a particular standard according to their requirements without going into the depth of each standard which often spans from hundreds to thousands of pages The book will allow people in the smart grid areas and in the related industries to easily understand the fundamental standards of smart grid and quickly find the building block standards they need from hundreds of standards for implementing a smart grid system The authors highlight the most advanced works and efforts now under way to realize an integrated and interoperable smart grid such as the NIST Framework and Roadmap for Smart Grid Interoperability Standards Release 2.0 the IEC Smart Grid Standardization Roadmap the ISO/IEC's Smart Grid Standards for Residential Customers the ZigBee HomePlug's Smart Energy Profile Specification 2.0 IEEE's P2030 Draft Guide for Smart Grid Interoperability of Energy Technology and Information Technology Operation with the Electric Power System (EPS) and End Use Applications and Loads and the latest joint research project results between the world's two largest economies US and China The book enables readers to fully understand the latest achievements and ongoing technical works of smart grid standards and assist industry utilities vendors academia regulators and other smart grid stakeholders in future decision making The book begins with an overview of the smart grid and introduces the opportunities in both developed and developing countries It then examines the standards for power grid domain of the smart grid including standards for blackout prevention and energy management smart transmission advanced distribution management and automation smart substation automation and condition monitoring Communication and security standards as a whole are the backbone of smart grid and their standards including those for wired and wireless communications are then assessed Finally the authors consider the standards and on going work and efforts for interoperability and integration between different standards and networks including the latest joint research effort between the world's two largest economies US and China A fully comprehensive introduction to smart grid standards and their applications for developers consumers and service providers Covers all up to date standards of smart grid including the key standards from NIST IEC ISO ZigBee IEEE HomePlug SAE and other international and regional standardization organizations The Appendix summarizes all of the standards mentioned in the book Presents standards for renewable energy and smart generation covering wind energy solar voltaic fuel cells pumped storage distributed generation and nuclear generation standards Standards for other alternative sources of energy such as geothermal energy and bioenergy are briefly introduced Introduces the standards for smart storage and plug in electric vehicles including standards for distributed energy resources DER electric storage and E mobility plug in vehicles The book is written in an accessible style ideal as an introduction to the topic yet contains sufficient detail and research to appeal to the more advanced and specialist reader

The Urbanism Reader Stefan Al,Tom Verebes,2025-02-06 Positioning design at the center of the debate The Urbanism Reader brings together classic and contemporary readings to help designers understand the complexities of cities and urban design in the 21st century The selection of readings presented here is

uniquely tailored to a design perspective for architects and urban designers balancing social issues in urbanism with a clear focus on foregrounding design as an instrument for change in cities and examining the outcomes and challenges of recent design theories design methods and technologies in the built urban environment Covering today's most urgent issues 45 texts explore key topics in urbanism from digital design technologies to smart cities from the ongoing ecological crisis to public health and the impact of Covid 19 and from emergence and informality to economic inequity in global cities Chapters cover cultural issues including diversity indigenous knowledge decolonization social justice and inclusion alongside technological developments while a final chapter speculates on the future of urbanism through readings in AI virtual reality and the frontiers of current thinking in architecture and urban design The extracts are grouped by theme each with an introduction to the historical contexts and guiding paradigms helping design students researchers and professionals to make sense of the diverse field of theory and practice in the past present and future of global urbanism *Background Noise*

Brandon LaBelle, 2006-01-01 The rise of a prominent auditory culture reveals the degree to which sound art is lending definition to the 21st Century And yet sound art still lacks related literature to compliment and expand the realm of practice *Background Noise* sets out an historical overview while at the same time shaping that history according to what sound art reveals the dynamics of art to operate spatially through media of reproduction and broadcast and in relation to the intensities of communication and its contextual framework *The SAGE Handbook of Architectural Theory* C. Greig Crysler, Stephen Cairns, Hilde Heynen, 2012-01-20 Offers an intense scholarly experience in its comprehensiveness its variety of voices and its formal organization the editors took a risk experimented and have delivered a much needed resource that upends the status quo Architectural Histories journal of the European Architectural History Network Architectural theory interweaves interdisciplinary understandings with different practices intentions and ways of knowing This handbook provides a lucid and comprehensive introduction to this challenging and shifting terrain and will be of great interest to students academics and practitioners alike Professor Iain Borden UCL Bartlett School of Architecture In this collection architectural theory expands outward to interact with adjacent discourses such as sustainability conservation spatial practices virtual technologies and more We have in *The Handbook of Architectural Theory* an example of the extreme generosity of architectural theory It is a volume that designers and scholars of many stripes will welcome K Michael Hays Eliot Noyes Professor of Architectural Theory Harvard University *The SAGE Handbook of Architectural Theory* documents and builds upon the most innovative developments in architectural theory over the last two decades Bringing into dialogue a range of geographically institutionally and historically competing positions it examines and explores parallel debates in related fields The book is divided into eight sections Power Difference Embodiment Aesthetics Pleasure Excess Nation World Spectacle History Memory Tradition Design Production Practice Science Technology Virtuality Nature Ecology Sustainability City Metropolis Territory Creating openings for future lines of inquiry and establishing the basis for new directions for education research

and practice the book is organized around specific case studies to provide a critical interpretive and speculative enquiry into the relevant debates in architectural theory **Background Noise, Second Edition** Brandon LaBelle, 2015-01-29 Follows the development of sound as an artistic medium and illustrates how sound is put to use within modes of composition installation and performance *Mechademia 5* Frenchy Lunning, 2013-11-30 Passionate fans of anime and manga known in Japan as otaku and active around the world play a significant role in the creation and interpretation of this pervasive popular culture Routinely appropriating and remixing favorite characters narratives imagery and settings otaku take control of the anime characters they consume *Fanthropologies* the fifth volume in the *Mechademia* series an annual forum devoted to Japanese anime and manga focuses on fans fan activities and the otaku phenomenon The zones of activity discussed in these essays range from fan subs fan subtitled versions of anime and manga and copyright issues to gender and nationality in fandom dolls and other forms of consumption that fandom offers Individual pieces include a remarkable photo essay on the emerging art of cosplay photography an original manga about an obsessive doll fan and a tour of Akihabara Tokyo s discount electronics shopping district by a scholar disguised as a fuzzy animal Contributors Madeline Ashby Jodie Beck McGill U Christopher Bolton Williams College Nait Chizuko Otsuna U Ian Condry Massachusetts Institute of Technology Martha Cornog Kathryn Dunlap U of Central Florida tsuka Eiji Kobe Design U Gerald Figal Vanderbilt U Patrick W Galbraith U of Tokyo Marc Hairston U of Texas at Dallas Marilyn Ivy Columbia U Koichi Iwabuchi Waseda U Paul Jackson Amamiya Karin Fan Yi Lam Thomas Lamarre McGill U Paul M Malone U of Waterloo Anne McKnight U of Southern California Livia Monnet U of Montreal Susan Napier Tufts U Kerin Ogg Timothy Perper Eron Rauch Brian Ruh Indiana U Nathan Shockey Columbia U Marc Steinberg Concordia U Jin C Tomshine U of California San Francisco Carissa Wolf North Dakota State U *Blue Carbon Mangrove Ecosystems* Miguel Clüsener-Godt, Hiroyuki Matsuda, Benno Böer, Ronald A. Smart Cities Zaigham Mahmood, 2018-04-13 This invaluable text reference investigates the state of the art in approaches to building monitoring managing and governing smart cities A particular focus is placed on the distributed computing environments within the infrastructure of such cities including issues of device connectivity communication security and

interoperability A selection of experts of international repute offer their perspectives on current trends and best practices and their suggestions for future developments together with case studies supporting the vision of smart cities based on the Internet of Things IoT Topics and features examines the various methodologies relating to next level urbanization including approaches to security and privacy relating to social and legal aspects describes a recursive and layered approach to modeling large scale resource management systems for self sustainable cities proposes a novel architecture for hybrid vehicular wireless sensor networks and a pricing mechanism for the management of natural resources discusses the challenges and potential solutions to building smart city surveillance systems applying knowledge based governance and adopting electric vehicles covers topics on intelligent distributed systems IoT fog computing paradigms big data management and analytics and smart grids reviews issues of sustainability in the design of smart cities and healthcare services illustrated by case studies taken from cities in Japan India and Brazil This illuminating volume offers a comprehensive reference for researchers investigating smart cities and the IoT students interested in the distributed computing technologies used by smart living systems and practitioners wishing to adopt the latest security and connectivity techniques in smart city environments

Bodies in Code Mark B. N. Hansen, 2012-10-02 Bodies in Code explores how our bodies experience and adapt to digital environments Cyberculture theorists have tended to overlook biological reality when talking about virtual reality and Mark B N Hansen's book shows what they've been missing Cyberspace is anchored in the body he argues and it's the body not high tech computer graphics that allows a person to feel like they are really moving through virtual reality Of course these virtual experiences are also profoundly affecting our very understanding of what it means to live as embodied beings Hansen draws upon recent work in visual culture cognitive science and new media studies as well as examples of computer graphics websites and new media art to show how our bodies are in some ways already becoming virtual

The Smart City Transformations Amitabh Satyam, Igor Calzada, 2017-07-03 A handbook for the practitioners this book is a complete treatise on the topic of Smart covering 1 A comprehensive framework with the needed definitions concepts strategies approaches and technologies to develop and manage a greenfield or brownfield Smart city 2 Integrating economics developmental concepts engineering environment and governance that sets the definitive foundation of the Smart framework 3 Technologies that are powering the Smart movement Extensive case studies 4 Societal and Political research and progress made by the academia 5 Specific methodology of measuring Smart elements of a city Introduction to the concepts of Smart Map and Smart Index 6 A structured approach to transformation setting priorities execution financing and governance The new structure and market dynamics of the Smart industry

Patterns of Interaction Pia Fricker, Toni Kotnik, 2023-02-06 This book is a reflection on contemporary computational design thinking at the intersection of architecture urban design and landscape architecture in a time marked by complex challenges like climate change urbanization and population growth Based on a critical rethinking of the notion of ground and the relation between the

manmade and the natural environment an understanding of architecture as regenerative practice is proposed It aims at a built environment as landscape at an architecture of prosthetic nature The design approach is illustrated by a number of design experiments conducted within a studio setting and complemented by a series of conversations with leading experts on sustainable design and landscape architecture **Initial Reports of the Deep Sea Drilling Project** ,1986-05
