philosophy In addition to the extensive treatment of critical theory's reception and development in international relations the book recovers a rival form of theory that originates outside the usual inheritance of critical international theory in Renaissance humanism and the civil Enlightenment This historical mode of theorising was intended to combat metaphysical encroachments on politics and international relations and to prioritise the mundane demands of civil government over the self reflective demands of dialectical social philosophies By proposing contextualist intellectual history as a form of critical theory Critical International Theory defends a mode of historical critique that refuses the normative temptations to project present conceptions onto an alien past and to abstract from the offices of civil government

frontier of the prevailing limited conception of the international to explore the hidden contributions to international theory which can be found in the non Western world Bringing in excluded non Western conceptions of international theory highlights a broader conception of the international The book provides a framework for theorizing globally exploring the fundamental problems with Western IR theory and how to overcome them This book will be used by advanced undergraduate and postgraduate students scholars researchers and IR theorists worldwide who are interested in non Western IR theory It will help navigate the problem of internationalness in the face of the grand theoretical problem of our time the use and misuse of international theory in making sense of and responding to the complex global realities of the twenty first century
