The God Effect is Real Sujith Ittan,2025-07-14 Something is really wrong with our reality It appears that our minds are being manipulated Synchronicities and the collective unconscious are clues about the mind manipulation mechanism This mechanism is the God effect according to the author The God effect implies that there is an intelligent entity controlling our minds Who is this intelligent entity manipulating our minds A God must be responsible for the God effect How exactly is this God manipulating our minds in this reality that is based on the principles of materialism that we know so well through our sciences We are unable to account for the God effect within the paradigm of materialism Are we in a reality based on idealism where consciousness is fundamental and an intelligent God exists in this context Or are we living inside a computer simulation What is the nature of our minds In order to account for God we have to question our understanding of our reality and we have to

ask if we are truly in control of our minds thoughts and actions This is a gist of the God mind and reality problem that the author tries to discuss in this book In his first book the author wondered if a simulation accounts for the God effect In this book he wonders if idealism with consciousness first principles and an intelligent God solves the problem **The Psychology and Science of Pseudoscience** Terence Hines,2025-03-12 This book provides a comprehensive review of numerous areas of pseudoscience and related pathological science It not only describes the factual bases for rejecting pseudoscientific claims but also emphasizes the psychological processes that lead to the acceptance of such claims This book is timely given the increase in misinformation over the past decade Using three principles of cognitive psychology this book helps explain why people are hard wired to accept and continue to believe in pseudoscientific claims It provides up to date discussions of numerous paranormal and pseudoscientific topics including the usual suspects UFOs and alien abductions astrology cryptozoology and more but also belief in conspiracy theories laboratory parapsychology bogus forensic science techniques the pseudopsychologies of Freud medical fraud and the unethical practices of Big Pharma Older research that was foundational in the critical examination of several topics is woven throughout to situate them in a historical context
