Drying and Storage Of Grains

and Oilseeds Donald B. Brooker,F.W. Bakker-Arkema,Carl W. Hall,1992-01-31 This text and reference discusses the drying of grains in particular the staple cereals maize rice and wheat and the oilseeds soybeans and canola The basic physical and thermodynamic properties of grain and air are examined and the theory of the drying process is developed Design of the optimum operating conditions for on farm and off farm dryers are presented The book is written as an engineering text but should also prove beneficial to all who are interested in the proper drying and storage of grains Examples and problems are given in both S I and Imperial units

Environmental and Functional Engineering of Agricultural Buildings H.

Barre,2012-12-06 This book has been written as a textbook for students seeking a professional degree in agricultural

engineering The authors believe that for students with this objective the course of study should be primarily analytical rather than descriptive and that the analytical approach should apply not only to ideas but also to quantitative procedures and computations We recognize that sound analysis particularly in applied fields is based on the understanding of theoretical principles and on knowledge of many practical considerations We have tried to maintain a good balance between the preparation of theory and practice but we favor emphasis of theoretical considerations on the basis that they usually are not mastered except in an organized course of study whereas practical knowledge is more easily assimilated To present both theory and practice makes heavy demands on class time and textbook space For this reason it has been possible to treat in detail only a few typical environmental systems for livestock housing and storing agricultural products as a means of illustrating methods of analysis and the application of principles It is presumed however that such study will prepare the student for work with other types of structures
