Unreason Kendrick Frazier, Benjamin Radford, 2023-10-17 UNREASON Exploring Pseudoscience Conspiracies and Extraordinary Claims is a collection of forty five of the best articles the legendary Skeptical Inquirer magazine has published in the past decade Featuring articles from writers including Neil deGrasse Tyson on the process of science Richard Dawkins on the standards of truth Elizabeth Loftus on memory Steven Pinker on the notion of progress and many others covering topics from the politicization of science to the frightening rise of misinformation each entry in this collection brings scientific examination to bear in order to ferret out the facts and misconceptions behind popular claims All of the articles within are interesting and readable Yet they are also quite diverse Some articles reinforce and complement each other others as happens in science may voice disagreements or differing perspectives But they all have one thing in common a respect for evidence a demand for the best most well tested most scientifically reliable information Readers will learn Why and how conspiracy rumors start spread and readily gain believers How to stay afloat in a sea of disinformation and survive the age of misinformation Why and how we form beliefs and adhere to them so powerfully How and why memory is fallible and what we can do about it How pseudoexperiments mislead the public about science Unreason will arm readers with scientific knowledge to curb the misinformation and misconceptions that increasingly threaten our civil discourse Even further these essays present a way for us to be better citizens equipped to deal with the winds of misinformation and disinformation swirling about us and better able to look ahead to a world where science and reason indeed just good old common sense can prevail

Life Driven Purpose Dan Barker, 2015-04-01 Every thinking person wants to lead a life of meaning and purpose For thousands of years holy books have told us that such a life is available only through obedience and submission to some higher power Today the faithful keep popular devotionals and tracts within easy reach on bedside tables and mobile devices all communicating this common message Life is meaningless without God In this volume former pastor Dan Barker eloquently powerfully and rationally upends this long held belief Offering words of enrichment

emancipation and inspiration he reminds us how millions of atheists lead happy loving moral and purpose filled lives Practicing what he preaches he also demonstrates through his own personal journey that life is valuable for its own sake that meaning and purpose come not from above but from within

The HEAD Game Philip Mudd, 2015-03-31 Become a High Efficiency Analytic Decision maker We've all been there faced with a major decision yet overwhelmed by the very data that is supposed to help us It's an all too common struggle in the digital age when Google searches produce a million results in a split second and software programs provide analysis faster than we could ever hope to read it Adapting the geopolitical and historical lessons gleaned from over two decades in government intelligence Philip Mudd an ex National Security Council staff member and former senior executive at the FBI and the CIA finally gives us the definitive guidebook for how to approach complex decisions today Filled with logical yet counterintuitive answers to ordinary and extraordinary problems whether it be buying a new home or pivoting a failing business model Mudd's HEAD High Efficiency Analytic Decision making methodology provides readers with a battle tested set of guiding principles that promise to bring order to even the most chaotic problems all in five practical steps What's the question Analysts often believe that questions are self evident but focusing on better questions up front always yields better answers later What are your drivers The human mind has a hard time juggling information so analysts need a system to break down complex questions into different characteristics or drivers How will you measure performance Once the question has been solidified and the drivers determined an analyst must decide what metrics they will use to understand how a problem and their solution to it is evolving over time What about the data Rather than looking at each bit of information on its own and up front an analyst can only overcome data overload by plugging data into their driver categories and excising anything that doesn't fit What are we missing Complex analysis isn't easy so it is imperative to assume that the process is flawed while also knowing how to check for possible gaps and errors such as availability bias halo effects and intuitive versus analytic methodologies Drawing deeply from his own harrowing experiences and mistakes in the line of duty Mudd has spent years refining and teaching his methodology to Fortune 500 companies and government organizations Now in the best selling tradition of Charles Duhigg's *The Power of Habit* and Oren Klaff's *Pitch*

Harrison, 2015 Critical thinking skills are essential for life in the 21st century In this follow up to his introductory guide *Think* and continuing his trademark of hopeful skepticism Guy Harrison demonstrates in a detailed fashion how to sort through bad ideas unfounded claims and bogus information to drill down to the most salient facts By explaining how the human brain works and outing its most irrational processes this book provides the thinking tools that will help you make better decisions ask the right questions at the right time know what to look for when evaluating information and understand how your own brain subconsciously clouds your judgment Think you're too smart to be easily misled Harrison summarizes scientific research showing how easily even intelligent and well educated people can be fooled We all suffer from cognitive biases embellished memories and the tendency to kowtow to authority figures or be duped by dubious truths packaged in appealing stories And as primates we are naturally status seekers so we are prone to irrational beliefs that seem to enhance our sense of belonging and ranking Emotional impulses and stress also all too often lead us into traps of misperception and bad judgment Understanding what science has discovered about the brain makes you better equipped to cope with its built in pitfalls Good Thinking the book and the practice makes clear that with knowledge and the right thinking skills anyone can lead a safer wiser more efficient and productive life *Minutes of Evidence Taken Before Her Majesty's Commissioners Appointed to Inquire Into the Subject of Agricultural Depression* Great Britain.
