Thinking Outside Box Creatively Applying:

The Palgrave Handbook of Applied Creativity in Global Higher Education Gerard J. Puccio, Amanda Lohiser, Camille A. McKayle, Frederik Hertel, 2025-09-30 This handbook explores how colleges and universities worldwide are fostering creativity as an essential skill for success in today's complex and fast-changing world. Featuring over 30 case studies, this volume presents innovative curricula, certificates, degrees, and initiatives designed to equip students with the creative thinking and problem-solving skills demanded in today's workplace. Despite the growing recognition of creativity as a crucial life and work skill, few institutions explicitly offer programs to cultivate it. This volume bridges that gap, presenting real-world examples from faculty who have developed applied creativity programs and first-hand student testimonials that describe their transformative impact. Drawing from psychology, business, and education research, this book demonstrates that creativity is not just an innate talent but a teachable, trainable expertise. Essential reading for educators, administrators, and policymakers, this book provides practical insights into designing programs and institution-wide strategies that empower students to navigate uncertainty, drive innovation, and thrive in an ever-evolving global landscape.

Creative Technologies for Multidisciplinary Applications Connor, Andy M., 2016-03-29 Given that institutions of higher education have a predisposition to compartmentalize and delineate areas of study, creative technology may seem oxymoronic. On the contrary, the very basis of western thought is found in the idea of transcendent knowledge. The marriage of opposing disciplines therefore acts as a more holistic approach to education. *Creative Technologies for Multidisciplinary Applications* acts as an inspiration to educators and researchers who wish to participate in the future of such multidisciplinary disciplines. Because creative technology encompasses many applications within the realm of art, gaming, the humanities, and digitization, this book features a diverse collection of relevant research for the modern world. It is a pivotal reference publication for educators, students, and researchers in fields related to sociology, technology, and the humanities.

The International Conference Education and Creativity for a Knowledge based Society - Social and Political Sciences, Communication, Foreign Languages and Public Relations, 2012, **Building AI-Powered Products** Marily Nika, 2025-02-15 Drawing from her experience at Google and Meta, Dr. Marily Nika delivers the definitive guide for product managers building AI and GenAI-powered products. Whether you're already leading product teams or are an aspiring product manager, and regardless of your prior knowledge with AI, this guide will empower you to confidently navigate every stage of the AI product lifecycle. Confidently manage AI product development with tools, frameworks, strategic insights, and real-world examples from Google, Meta, OpenAI, and more.
