Long, 2015-07-30 Teaching for Historical Literacy combines the elements of historical literacy into a coherent instructional framework for teachers It identifies the role of historical literacy analyzes its importance in the evolving educational landscape and details the action steps necessary

for teachers to implement its principles throughout a unit These steps are drawn from the reflections of real teachers grounded in educational research and consistent with the Common Core State Standards The instructional arc formed by authors Matthew T Downey and Kelly A Long takes teachers from start to finish from managing the prior learning of students to developing their metacognition and creating synthesis at the end of a unit of study It includes introducing topics by creating a conceptual overview helping students collect and analyze evidence and engaging students in multiple kinds of learning including factual procedural conceptual and metacognitive This book is a must have resource for teachers and students of teaching interested in improving their instructional skills building historical literacy and being at the forefront of the evolving field of history education **The Teaching American History Project** Rachel G. Ragland, Kelly A.

Woestman, 2010-05-26 The premise of the Teaching American History TAH project a discretionary grant program funded under the U S Department of Education s Elementary and Secondary Education Act is that in order to teach history better teachers need to know more history Unique among professional development programs in emphasizing specific content to be taught over a particular pedagogical approach TAH grants assist schools in implementing scientifically based research methods for improving the quality of instruction professional development and teacher education in American history Illustrating the diversity of these programs as they have been implemented in local education agencies throughout the nation this collection of essays and research reports from TAH participants provides models for historians teachers teacher educators and others interested in the teaching and learning of American History and presents examples of lessons learned from a cross section of TAH projects Each chapter presents a narrative of innovation documenting collaboration between classroom community and the academy that gives immediate and obvious relevance to the teaching and learning process of American history By sharing these narratives this book expands the impact of emerging practices from individual TAH projects to reach a larger audience across the nation Handbook of Multiple Source Use Jason L.G. Braasch, Ivar

Bråten, Matthew T. McCrudden, 2018-04-09 The Handbook of Multiple Source Use draws on theory and research within cognitive and educational psychology the learning sciences disciplinary education information literacy reading psychology and social psychology to present the first comprehensive research volume on this topic Many learners both in and out of school have almost instantaneous access to an enormous range of information sources at present In this book broken into six sections international scholars come together toward understanding factors that influence how individuals cope with the challenge of building knowledge from diverse often conflicting information **Teaching Historical Narratives** Jon A.

Levisohn, 2024-11-28 With this book Jon Levisohn argues that current history education is set up in a way that sees students of history at one end of a continuum with the academic experts in the field of history at the other and where the goal of history education is to help students to think like historians Building on a critical engagement with Carl Hempel Hayden White and David Carr as well as contemporary work in virtue epistemology Levisohn proposes a new theory of historiography

which serves as a set of guidelines for the teaching and learning of history According to the theory the work of historiography is best characterized as a negotiation among narratives weaving together received narratives with new information and ideas in order to construct a new narrative This negotiation happens with a particular orientation towards negative evidence or flexible disconfirmationism and is assessed according to the openness sensitivity responsibility creativity boldness and humility i e the virtues of historical interpretation The book rethinks the work of history education offering new ways of thinking about the goals of the teaching of history namely in terms of the cultivation of the interpretive virtues Exploring Signature Pedagogies Regan A. R. Gurung, Nancy L. Chick, Aeron Haynie, 2023-07-03 From the Foreword These authors have clearly shown the value in looking for the signature pedagogies of their disciplines Nothing uncovers hidden assumptions about desired knowledge skills and dispositions better than a careful examination of our most cherished practices The authors inspire specialists in other disciplines to do the same Furthermore they invite other colleagues to explore whether relatively new interdisciplinary fields such as Women s Studies and Global Studies have or should have a signature pedagogy consistent with their understanding of what it means to apprentice in these areas Anthony A Ciccone Senior Scholar and Director Carnegie Academy for the Scholarship of Teaching and Learning How do individual disciplines foster deep learning and get students to think like disciplinary experts With contributions from the sciences humanities and the arts this book critically explores how to best foster student learning within and across the disciplines This book represents a major advance in the Scholarship of Teaching and Learning SoTL by moving beyond individual case studies best practices and the work of individual scholars to focus on the unique content and characteristic pedagogies of major disciplines Each chapter begins by summarizing the SoTL literature on the pedagogies of a specific discipline and by examining and analyzing its traditional practices paying particular attention to how faculty evaluate success Each concludes by articulating for its discipline the elements of a signature pedagogy that will improve teaching and learning and by offering an agenda for future research Each chapter explores what the pedagogical literature of the discipline suggests are the optimal ways to teach material in that field and to verify the resulting learning Each author is concerned about how to engage students in the ways of knowing the habits of mind and the values used by experts in his or her field Readers will not only benefit from the chapters most relevant to their disciplines As faculty members consider how their courses fit into the broader curriculum and relate to the other disciplines and design learning activities and goals not only within the discipline but also within the broader objectives of liberal education they will appreciate the cross disciplinary understandings this book affords **Wisconsin Magazine of History** ,2009 Current Index to Journals in Education ,2000 **AHA Perspectives** ,1996 **Perspectives** ,2007 British Humanities Index ,2000 **Journal of Developmental Education** ,2015 The Historian ,1986 *The Challenge of Rethinking History Education* Bruce VanSledright,2010 Every few years in the United States history teachers go through what some believe is an embarrassing national ritual A representative group of students sit down to take a

standardized U S history test and the results show varied success. Sizeable percentages of students score at or below a basic understanding of the country's history. Pundits seize on these results to argue that not only are students woefully ignorant about history but history teachers are simply not doing an adequate job teaching historical facts. The overly common practice of teaching history as a series of dates, memorizing the textbook and taking notes on teachers' lectures ensues. In stark contrast, social studies educators like Bruce A. VanSledright argue instead for a more inquiry-oriented approach to history teaching and learning that fosters a sense of citizenship through the critical skills of historical investigation. Detailed case studies of exemplar teachers are included in this timely book to make visible in an easily comprehensible way the thought processes of skilled teachers. Each case is then unpacked further to clearly address the question of what history teachers need to know to teach in an investigative way. *The Challenge of Rethinking History Education* is a must read for anyone looking for a guide to both the theory and practice of what it means to teach historical thinking to engage in investigative practice with students and to increase students' capacity to critically read and assess the nature of the complex culture in which they live.
