Production, Properties, and Applications of High Temperature Coatings Pakseresht, Amir Hossein, 2018-01-12

Heat resistant layers are meant to withstand high temperatures while also protecting against all types of corrosion and oxidation. Therefore, the micro structure and behavior of such layers is essential in understanding the functionality of these materials in order to make improvements. *Production Properties and Applications of High Temperature Coatings* is a critical academic publication which examines the methods of creation, characteristics, and behavior of materials used in heat resistant layers. Featuring coverage on a wide range of topics such as thermal spray methods, sol gel coatings, and surface nanoengineering, this book is geared toward students, academicians, engineers, and researchers seeking relevant research on the methodology and materials for producing effective heat resistant layers.

Unmanned Aerial Vehicles Applications: Challenges and Trends Mohamed Abdelkader, Anis Koubaa, 2023-06-29 This is a book that covers different aspects of UAV technology, including design and development, applications, security, and communication, and legal and regulatory challenges. The book is divided into 13 chapters grouped into four parts. The first part discusses the design and development of UAVs, including ROS customization, structured designs, and intelligent trajectory tracking. The second part explores diverse applications such as search and rescue, monitoring, distributed parameter systems, and leveraging drone technology in accounting. The third part focuses on security and communication challenges, including security concerns, multi-UAV systems, and communications security. The final part delves into the legal and regulatory challenges of integrating UAVs into non-segregated airspace. The book serves as a valuable resource for researchers, practitioners, and students in the field of unmanned aerial vehicles, providing a comprehensive understanding of UAV technology and its applications.

Advances in Terahertz Technology and Its Applications Sudipta

Das, N. Anveshkumar, Joydeep Dutta, Arindam Biswas, 2021-10-30 This book highlights the growing applications of THz technology and various modules used for their successful realization. The enormous advantages of THz devices, like higher

resolution spatial directivity high speed communication greater bandwidth non ionizing signal nature and compactness make them useful in various applications like communication sensing security safety spectroscopy manufacturing bio medical agriculture imaging etc Since the THz radiation covers frequencies from 0.1 THz to around 10 THz and highly attenuated by atmospheric gases they are used in short distance applications only The book focuses on recent advances and different research issues in terahertz technology and presents theoretical methodological well established and validated empirical works dealing with the different topics

The Roots of Developing Agriculture in the South African Context

MCGREGGOR S. NTULI, 2013 The Roots of Developing Agriculture in the South African Context is meant to be a reader that addresses the current status and the possible future position of Developing Agriculture into perspective given the transformation it is currently undergoing in South Africa Much emphasis is deliberately placed on the experiences of the developing farmer and to a lesser extent that of the role players of the industry This means that the book is meant to focus on the actual proceedings of the industry particularly at farmers level as opposed to expounding on literature based findings or documented policies that do not reflect the actual state of affairs The need of writing such a book came after realizing that the servants of this industry have varied perspectives in terms of the winning formula that would ensure its successful progression of refining the industry by uplifting emerging farmers of South Africa An additional reason is that it is the very same role players of the very same industry who dedicate much time in transferring technical information that elaborates on the management of a farming business as well as how to produce agricultural products to farmers whilst continuously neglecting the need to identify and apply the principles that would ensure the attainment of the ultimate industrial goal of uplifting developing farmers so as to make positive contributions towards the local economy As a result of the latter reason the publishing of technical information has been one of the strongest points of South African agriculture However with all this information made available to farmers and various agriculturalists in abundance the industry still experiences a low success rate in its attempt to transform previously disadvantaged farmers despite providing them with the relevant technical knowledge This clearly shows the gap and the need of having such a book that will not only put the author's perspective and suggested solutions into perspective but will also consolidate some of those that are being shared in all sorts of formal and informal gatherings The above passage details the central theme of the book which will be sufficient to cover the content of the subject Therefore the scope of readers will include everyone in the agricultural sector as well as those who have the interest in and are affected by agriculture and current affairs of South Africa
