Water, 2012 **Urban Water Demand Management** Corinne Ong, Cecilia Tortajada, Ojasvee Arora, 2023-05-13 This open access book highlights knowledge and expertise in Urban Water Demand Management WDM in ASEAN through comprehensive literature review and analysis as well as stakeholder consultations It documents urban WDM policies initiatives and practices that have demonstrated effective implementation outcomes across various contexts and which are expected to be relevant for cities in ASEAN A WDM typology developed for this book identifies four key WDM measures namely water losses economic instruments non price mechanisms and alternative water reuse systems in the ASEAN context Case illustrations of their effective implementation in different ASEAN cities are also included Global Water Security World Water Council, 2018-02-02 This book highlights the relationship between the water sector and various other sectors in order to establish an improved understanding of the importance of water resources as an essential cross cutting vector of socio economic development The book is both policy and practice oriented and is not constrained by existing definitions on water security It includes actual experiences of policy management development and governance decisions taken within the water sector and examples on how these have affected the energy and agricultural sectors as well as impacted the environment and vice versa as appropriate It also discusses trade offs short and long term implications lessons learnt and the way forward The book includes case studies on cities countries and regions such as Australia China Singapore Central Asia Morocco Southern Africa France Latin America Brazil and California *A City in Blue and Green* Peter G. Rowe, Limin Hee, 2019-08-30 This open access book highlights Singapore s development into a city in which water and greenery along with associated environmental technical social and political aspects have been harnessed and cultivated into a liveable sustainable way of life It is also a story about a unique and thoroughgoing approach to large scale and potentially transferable water sustainability within largely urbanized circumstances which can be achieved along with complementary roles of environmental conservation ecology public open space management and the greening of buildings together with infrastructural improvements *Handbook of Catchment Management* Robert C. Ferrier, Alan Jenkins, 2021-07-01 **HANDBOOK OF CATCHMENT MANAGEMENT** In 2010 the first edition of the Handbook of Catchment Management provided a benchmark on how our understanding and actions in water management within a catchment context had evolved in recent decades Over ten years on the catchment management concept is entering a new phase of development aligned to contemporary and future challenges These include climate change uncertainty further understanding in ecological functioning under change the drive for a low carbon energy efficient and circular society multiple uses of water the emergence of new pollutants of concern new approaches to valuation finance and pricing mechanisms stewardship and community engagement the integration of water across the Sustainable Development Goals SDG and the link between water energy and food These developments are framed within an increasingly data rich world where new analytics sensor

technology and processing power are informing increasingly real time decision making The challenge is also to increase cross compliance and policy integration to meet multiple stakeholder objectives and to link actions to achieve cost effective outcomes In addition there are a number of new and exciting city region and basin scale real world examples of contemporary and new catchment thinking integrating science technology knowledge and governance to address multiple drivers and complex problems from across the globe The time is now right to capture the new challenges facing catchment management and water resources management globally This revised and updated edition of the Handbook of Catchment Management features Thoroughly rewritten chapters which provide an up to date view of catchment management issues and contexts New case study material highlighting multi sectoral management in different globally significant basins and different geographical locations Up to date topics selected for their resonance not only in natural sciences and engineering but also in other fields such as socio economics law and policy The Handbook is designed for a broad audience but will be particularly useful for advanced students researchers academics and water sector professionals such as planners consultants and regulators

The Active, Beautiful, Clean Waters Programme ,2017 It documents the development of the Active Beautiful Clean Waters Programme and illustrates the potential of Singapore s blue spaces as environmental assets to enhance the liveability of urban environments
