As an operator, you are responsible to your employer for maintaining an economical and efficient operating facility.

(Ans - **TRUE**)

An operator has an obligation to the great numbers of people who rely on down stream water supplies and are totally dependent on the operator's competence and trust worthiness for their welfare

(Ans - **TRUE**)

Today, the natural purification processes in rivers treat all the waste loads and keep rivers clean.

(Ans - **FALSE**)

Operators are water quality protectors on the front line of the water pollution battle.

(Ans - **TRUE**)

The main benefit of a successful wastewater treatment program is the protection of the public health.

(Ans - **TRUE**)

Without adequate, reliable records of every phase of operation, the effectiveness of your operation has not been documented (recorded).

(Ans - **TRUE**)

Your records showing a high-quality effluent will mean nothing to citizens visiting your plant unless your plant appears clean and well maintained and the effluent looks good.

Handbook for Waterworks Operator Certification Frank R. Spellman, 2000-11-06. This three volume series is designed to prepare waterworks operators for certification and licensure exams. Volume 1 is the only such volume based on the recently amended Safe Drinking Water Act and provides the tools to understand the microbiological and chemical hazards of water in light of the quality standards treatment plants must achieve. With its clear explanations of basic math, hydraulics, electricity, and plant processes, it prepares the drinking water plant operator for further study of all aspects of drinking water operations including purification and distribution. Abundant cases, problems, and a full scale battery of examination questions enable the reader to apply the book's lessons into practice both on the job and in the classroom. Volume 2 is designed to give the experienced operator the means to advance to higher levels. Its content has been selected and organized in accord with SDWA requirements for the continuing education of operators. After reviewing basic math, this volume presents information and calculations for critical areas of operator responsibility from intake, disinfection, and pumping through odor control and distribution. Self check questions and a final examination enable the reader to monitor progress and prepare for certification and licensure testing. Volume 3 is a forthcoming title for the year 2001 and is intended for advanced operators. It represents an in depth treatment of plant processes and operations and stresses troubleshooting and problem solving. Questions and answers are included plus an entire sample test suitable for self study prior to licensure examinations.
