

Potentiality and Actuality

- To explain the process of change, Aristotle uses the concepts of Potentiality and Actuality
- Within everything, people included, there exists a natural evolution toward fulfilling its own potential. In Plato's terms, becoming its own Form
- Potentiality is the movement in nature and in humans from imperfection to perfection (aka. Actuality)
 - This is a hardwired component in all things that is an involuntary process
 - Cosmic scale- Big Bang to Big Chill
 - Individual scale- Birth to Death
 - Aristotle called this entelechy- the self-contained end of anything

Ways Of Being Potentiality And Actuality In Aristotles Metaphysics:

Ways of Being Charlotte Witt,2003 Charlotte Witt continues her highly regarded exploration of Aristotle s metaphysics in a book devoted to the ontological distinction between potentiality and actuality She focuses on Metaphysics book ix which provides the most sustained discussion of this distinction Witt rejects the conventional reading of this key text that Aristotle differentiated between the two concepts solely to further the investigation of substance Instead in an original interpretation of his work she argues that his development of the distinction between being x potentially and being x actually allowed Aristotle to develop an intrinsically hierarchical and normative vision of reality For Witt Aristotle s views about being shed light on his puzzling use of gender language in his descriptions of reality This language has become an important issue for feminist scholars who have noted that in Aristotle s metaphysics of substance form is sometimes associated with the male and matter with the female Witt s interpretation that Aristotelian reality is intrinsically hierarchical and normative but not intrinsically gendered offers a new important understanding of a controversial aspect of Aristotle s metaphysics

Proceedings of the Boston Area Colloquium in Ancient Philosophy John J. Cleary,Gary Gurtler,2007-05-28 This volume contains papers and commentaries presented to the Boston Area Colloquium in Ancient Philosophy during the academic year 2005 6 Of the two colloquia on Neoplatonism one offers a phenomenological reading of Plotinus on the Intellect while the other discusses consciousness and introspection in Plotinus and Augustine With regard to Aristotle s ethics one colloquium discusses the influence of force and compulsion on human action while another examines his views on the relationship between external goods and happiness Two other colloquia are devoted to Aristotle s Metaphysics discussing form and function in relation to his theory of substance as well as his paradigmaticism Finally a single colloquium on Plato discusses the happiness of philosopher kings in the Republic

Eccentricity in Anthropology Stephen R. Milford,2019-06-07 *Eccentricity in Anthropology* brings into conversation a constructive critical interpretation of David Kelsey s Eccentric Existence with a central yet often overlooked debate in theological anthropology the substantive relational imago Dei Milford s work explores new insights into human identity and dignity In particular he demonstrates the value of an alternate constructive of humanity in the image of God This construction utilizes an interpretation of Kelsey s anthropological formula so as to describe human identity as part of the created order in terms of its myriad features which are externally rooted *Eccentricity in Anthropology* demonstrates that an alternate approach to this debate is possible and that one can combine important aspects of both substantive and relational thinking As such Milford s work is an important contribution to studies in the doctrine of the imago Dei Taking Eccentric Existence s invitation to act as a springboard for further debate seriously it presents one possible fruitful use of Kelsey s work to address theological anthropological questions In a very real sense this book is both a discussion in systematic theology and at the same time a work in contemporary historical theology

Method in Ancient Philosophy Jyl Gentzler,2001 Method in Ancient Philosophy brings together fifteen new specially

written essays by leading scholars on a broad subject of central importance. It is characteristic of human beings that they direct their activities by reasoning but methods of reasoning even towards the same ends vary. Self-conscious reflection on the methods of reasoning marks the beginning of philosophy in the West and the views of the ancient Greeks have had considerable influence upon our own assumptions about the demarcations between different kinds of enquiry and the sorts of methods that are appropriate for them. For this reason examination of how the ancients reasoned and how they thought about methods of reasoning helps us to see how they came to hold the views they did and how we have come to think as we do. Most of the essays focus on Socrates, Plato or Aristotle but earlier and later ancient philosophy is brought into the picture by essays on Eleatic and Epicurean thought.

[Aristotle's Metaphysics](#) Aristotle, 1924 *One and Many in Aristotle's Metaphysics* Edward C. Halper, 2009 Halper's work develops a new approach to one of the most extensively studied philosophical classics. He removes Aristotle's *Metaphysics* from the medieval and contemporary lenses through which it is typically viewed and places it squarely within the context of Greek metaphysical speculation. As a result, many passages become intelligible philosophical arguments.
