

WRT54G EJTAG DeBrick Guide

Ok – Let's just be clear on a couple things right up front:

- 1) If you use EJTAG or any form of JTAG to recover (debrick) your WRT54G unit you do so fully *****at your own risk*****.
- 2) I (nor Linksys) will not/can not be held accountable for anything you screw up using this (including your router). [If you want to complain to Broadcom for not releasing chip specs – be my guest.]
- 3) This *****will void your warrantee*****. (Of course – if you already popped the lid off your router it is already voided anyhow)
- 4) I "hate" writing documentation – so this is it – take it or leave it! (i.e. – don't ask for another guide)

Introduction

I guess if you are reading this you probably either have a bricked WRT54G v2 router or you want the capability to be able to re-flash your Intel Flash chip on your router in an alternate manner in case the normal method(s) do not work.

Well I unfortunately found myself exactly in that spot... trying to upgrade the firmware and it crashed hard and nothing could revive it. So I decided that I must not be alone in this and that there may be a need for JTAG recovery of the flash chip. I started into this project and quickly found Broadcom was about the worst chipmaker out there at releasing info about their chips unless you signed a NDA
