The story of Kar Kraft began as did many others in the automotive industry with an axe to grind In 1963 Ford was seriously interested in purchasing Ferrari Ferrari was a legendary brand with considerable success in racing and Ford saw the acquisition as a great way to be instantly successful in the racing arena When Enzo Ferrari realized that Ford would not give him complete control of the racing program he backed out of the deal late in the process Ford had spent

millions in vetting and audits which then set in motion a vengeful response against Ferrari The result was the unthinkable Ford beat Ferrari at Le Mans Ford wanted to become competitive quickly but it did not have the race history or resources in house To remedy the situation Ford searched the U K for an independent company to help accelerate its race car development It first settled on Lola Cars and set up Ford Advanced Vehicles Later Ford brought its LeMans effort to the U S and the Kar Kraft relationship was established Although Kar Kraft was technically an independent company it really only had one customer Ford Special Vehicles Kar Kraft s story doesn t begin and end with the GT 40 that took the win away from Ferrari at Le Mans Ford expanded upon the program and organized an all out assault on racing in general Cars were prepared for Trans Am NASCAR NHRA and Can Am competition Street versions of the Boss 429 were assembled under its roof And famed prototypes including the LID Mustang Boss 302 Maverick and Mach 2C were all assembled in Ford s contracted race shop And then out of the blue its doors closed for good on a cold day in 1970 History tells us that Ford won Le Mans the Daytona 500 and the Trans Am championship But it doesn t tell us how this was accomplished Author Charlie Henry a former Kar Kraft employee has enlisted the help of many of his former co workers to bring you the very first book ever published on Ford s all encompassing special projects facility Kar Kraft

In an era before corporate average fuel economy CAF requirements and emissions standards a pioneering General Motors executive was tasked with taking over a dying division and returning it to profitability In June 1956 Semon E Bunkie Knudsen became the general manager of the Pontiac Motor Division He injected the stodgy boring product line with a large dose of performance Race on Sunday sell on Monday was Knudsen s philosophy Although the idea of Pontiac getting into racing was far fetched in 1956 Knudsen had a plan In 1957 Pontiac released the Bonneville which was a limited edition fuel injected high performance convertible that was aimed directly at the burgeoning enthusiast market Knudsen skillfully crafted a new youthful persona for Pontiac and the sales began to climb Pontiac s Super Duty factory built drag cars produced an amazing line of winners The performance mentality was clearly working as Pontiac sales jumped to third place among the manufacturers behind only Chevrolet and Ford After GM ceased all racing activities in 1963 Pontiac hardly missed a beat In 1964 the GTO was released and a new market segment the muscle car was born which sent the competition back to the drawing boards In addition Pontiac continued to create iconic muscle cars including the 2 2 the Ram Air GTO and Firebird the Trans Am the Judge and the Firebird Formula Re live Pontiac s golden era with Pontiac Performance 1960 1974 The Era of the Super Duty H O Ram Air Drag Muscle Cars **Drag Racing in the 1960s** Doug Boyce,2021-03-15 The 1960s were a fascinating decade on the race scene Relive the memories today through this wonderful new book Drag racing has a long and storied history Many have said that the first drag race happened shortly after the second car was made While that may or may not be true racing prior to World War II was mostly centered around dry lake activities and top speed runs After the war drag racing became organized with the formation of the NHRA and during the 1950s many tracks were built across America to accommodate the racers Technology in the 1950s centered on the manufacturers updating old flathead designs into newer overhead valve designs and
