Tourism Globalization And Development Responsible Tourism Planning:

Tourism, Globalization and Development Donald G. Reid, 2003-07-20 Tourism is booming world wide it makes up a massive part of the global economy Donald G Reid s book focuses on tourism in developing and less developed countries He examines its social and environmental impact and offers a timely critical analysis of the part it plays in globalisation Many of the world s poorest countries rely on the tourist trade for the major part of their income However all too often the local communities involved do not reap the benefits of this trade Developers often exclude local communities from the initial planning and decision making process viewing them either as a benign resource to be exploited or as an impediment This is a rigorous critique of corporate led tourism development which lays out alternatives for planning and control to the local communities It argues that only in this way can the vastly differing requirements of each community be addressed and social and environmental issues can be dealt with properly The book includes a discussion of macro planning theory and offers three case studies of locally controlled projects that show clearly how communities developing a tourist trade can benefit

Pro-poor Tourism Colin Michael Hall, 2007 Pro poor tourism is currently receiving enormous attention from the World Tourism Organization government industry and NGOs Through a series of cases and reviews this book provides one of the first assessments of the effectiveness of pro poor tourism as a development strategy and tackles the issue of who benefits from tourism s potential role in poverty reduction

Tourism, Planning, and Community Development Rhonda Phillips, Sherma Roberts, 2013-09-13 The intersection of community development tourism and planning is a fascinating one Tourism has long been used as a development strategy in both developed and developing countries from the national to local levels These approaches have typically focused on economic dimensions with decisions about tourism investments policies and venues driven by these economic considerations More recently the conversation has shifted to include other aspects social and environmental to better reflect sustainable development concepts Perhaps most importantly is the richer focus on the inclusion of stakeholders An inclusionary participatory approach is an essential ingredient of community development and this brings both fields even closer together It reflects an approach aimed at building on strengths in communities and fostering social capacity and capital In this book the dimensions of the role tourism plays in community development are explored A panoply of perspectives are presented tackling such questions as can tourism heal How can tourism development serve as a catalyst to overcome social injustices and cultural divides This book was originally published as a special issue of *Community Development*

Managing Coastal Tourism Resorts Sheela Agarwal, Gareth Shaw, 2007-10-19 The vast majority of existing academic research of coastal tourism resort management has been undertaken in northern and southern Europe at the expense of a wider global consideration This book aims to address this deficit and develop a global perspective on the management issues facing coastal resorts By drawing on examples it incorporates a detailed analysis of a range of economic socio cultural political and environmental issues which are being experienced to differing extents by coastal tourism resorts

which are at different life cycle stages of development The major management themes highlighted include the processes of restructuring attempts to develop sustainable agendas and environmental issues of developing resorts in sensitive areas Written by key experts this book provides a critical assessment of the key management issues facing coastal tourism resorts globally In doing so it represents more than a mere amalgamation of existing literature as it aims to advance conceptual understanding of resort evolution and change Tourism Development P. Burns, Marina Novelli, 2008 A collection of essays from scholars evaluating tourism as a means of stimulating economic growth and fighting economic inequalities in poor countries It takes a look at the successes and failures of tourism in this role and considers why tourism as a catalyst for economic development can be a controversial device *Trust, Tourism Development and Planning* Robin Nunkoo, Stephen L.J. Smith, 2014-08-07 The dynamics of trust and distrust are central to understanding modern society social relations and development processes However numerous studies suggest that societal trust and citizen s trust in government and its institutions are on the decline challenging the legitimacy of government and leading to an undemocratic and unsustainable form of development Recognizing its importance the authors for the first time situate trust within the context of tourism development and planning This volume discusses trust in tourism from different yet intrinsically connected perspectives Chapters review how diminishing societal trust may have adversely affected tourism planning systems the role of trust in good tourism governance and sustainable tourism how trust can be used as a facilitator of participatory tourism planning political trust in tourism institutions power and how tourism development can be a basis for trust creation among society members by using social capital theory In addition a final section on Researching Trust in Tourism Development means that readers are not only provided a thorough theoretical framework on trust and an understanding of its importance for sustainable tourism and good governance of the sector but also methodological aspects of research on trust in the context of tourism development and planning This significant volume is valuable reading for students academics and researchers interested in tourism development and planning *TOURISM: Concepts, Theory and Practice* M R Dileep, 2018-09-18 *Tourism Concepts Theory and Practice* deals with all the fundamental aspects of tourism that are to be learnt by students of tourism air transport travel and hospitality disciplines It gives an insight into the concept of tourism from different perspectives various types of tourism travel motivation and demand industrial elements of tourism destination and its elements various organizations functioning in tourism planning and development of tourism and its benefits and impacts Moreover various aspects of sustainable tourism ecotourism and responsible tourism are also included An introduction to marketing and information technology applications in tourism is also given The book concludes with a discussion on current status of tourism contemporary issues in tourism and the future prospects This book with detailed information on tourism principles policies and practices will prove to be an essential learning tool for all those pursuing a career in any sector of tourism **Tourism Governance** Bill Bramwell, Bernard Lane, 2013-12-16 The role of governance has only recently begun

to be researched and discussed in order to better understand tourism policy making and planning and tourism development Governance encompasses the many ways in which societies and industries are governed given permission or assistance or steered by government and numerous other actors including the private sector NGOs and communities This book explains and evaluates critical perspectives on the governance of tourism examining these in the context of tourism and sustainable development Governance processes fundamentally affect whether and how progress is made toward securing the economic socio cultural and environmental goals of sustainable development The critical perspectives on tourism governance examined here challenge and re conceptualise established ideas in tourism policy and planning as well as engage with theoretical frameworks from other social science fields The contributors assess theoretical frameworks that help explain the governance of tourism and sustainability They also explore tourism governance at national regional and local scales and the relations between them They assess issues of power and politics in policy making and planning and they consider changing governance relationships over time and the associated potential for social learning The collection brings insights from leading researchers and examines important new theoretical frameworks for tourism research This book was originally published as a special issue of Journal of Sustainable Tourism

Tourism and Development in the Developing World David J. Telfer, Richard Sharpley, 2015-12-14 Tourism is widely considered to be an important factor in socio economic development particularly in less developed countries However despite almost universal recognition of tourism s development potential the extent to which economic and social progress is linked to the growth of a country s tourism sector remains the subject of intense debate *Tourism and Development in the Developing World* offers a thorough overview of the tourism development relationship Focusing specifically on the less developed world and drawing on contemporary case studies this updated second edition questions widely held assumptions on the role of tourism in development and seeks to highlight the challenges faced by destinations seeking to achieve development through tourism The introductory chapter establishes the foundation for the book exploring the meaning and objectives of development reviewing theoretical perspectives on the developmental process and assessing the reasons why less developed countries are attracted to tourism as a development option The concept of sustainable development as the most widely adopted contemporary model of development is then introduced and its links with tourism critically assessed Subsequent chapters explore the key issues associated with tourism and development including the rise of globalization the tourism planning and development process the relationship between tourism and communities within which it is developed the management implications of trends in the demand for and uptake of tourism and an analysis of the consequences of tourism development for destination environments economies and societies A new chapter considers the challenges of climate change sustainability of resource supply oil water and food global economic instability political instability and changing demographics Finally the issues raised throughout the book are drawn together in a concluding chapter that assesses the tourism and development dilemma Combining an overview of essential

concepts theories and knowledge with an analysis of contemporary issues and debates in tourism and development this new edition will be an invaluable resource for those investigating tourism issues in developing countries The book will be of interest to students of tourism development geography and area studies international relations and politics and sociology

Tourism and the Millennium Development Goals Jarkko Saarinen, Christian M. Rogerson, Haretsebe Manwa, 2013-10-31 In 2000 United Nations adopted the Millennium Development Goals UN MDGs committing the member nations to a new global partnership to reduce extreme poverty and setting out a series of specific targets with a deadline of 2015 Related to the UN MDGs tourism is increasingly seen as a promising tool for poverty reduction ensuring environmental sustainability and developing a global partnership for development for example Thus the industry has become an important policy tool for community and regional development in many developing countries and the expectations for tourism and its social and economic outcomes have evolved to a high level However there are still many challenges to overcome in the relationship between tourism industry development and poverty reduction This book aims to discuss the promises challenges and outcomes of tourism in development with a specific aim of drawing together research related to tourism and UN MDGs The papers discuss what lessons can be learnt and conclusions drawn from the utilisation of tourism for development and poverty reduction What emerges from this collection is a set of interesting results and notions which both support and challenge the connections between tourism and development and the new role of tourism in global development This book is an extended version of a special issue published in Current Issues in Tourism
