Hans Günter Brauch

Toward A Science Of Human Nature:

Toward a Science of Human Nature Daniel N. Robinson, 1982-01 Robinson unfolds the vision of four influential writers on psychology J S Mill F Hegel Wilhelm Wundt and William James who considered the world its persons and problems its possibilities and conflicts its scientific facts and its moral ambiguities and proceeded to devise a means by which to improve it Robinson shows how in thinking about psychology these individuals provided an intellectual context within which the discipline could be refined

Towards Rethinking Politics, Policy and Polity in the Anthropocene Hans Günter Brauch, 2025-02-24 Humankind faces two anthropogenic threats to its survival that are closely linked The first is the end of the Holocene and the start of the Anthropocene which was marked by the test of a nuclear bomb on 16 July 1945 In the prevailing peace and security narrative nuclear weapons and the other country bloc or alliance pose a perceived threat to humankind s survival In the Anthropocene narrative we are the threat through our way of life and the burning of fossil fuels The start of the Anthropocene coincides with a change in the international order with the setting up of the UN and the Bretton Woods Institutions Three stages of this order are distinguished the Cold War bipolarity the post Cold War era unipolarity and the end of the rule based global liberal order multipolarity on 24 February 2022 In this book ten multidisciplinary perspectives discuss complexity Anthropocene geopolitics peace and security discourses and the debate on the Anthropocene planetary boundaries complex crises and integrative geography in the Anthropocene governance and politics and the Patriocene and gender Both existential threats for humankind are illustrated by cover photos of the first nuclear weapons test on 16 July 1945 and by Category 5 Hurricane Otis an extreme weather event impacting on Acapulco in Mexico on 25 October 2023 The Anthropocene as a new epoch of Earth history coincides in 1945 with a change in the international order In the security and peace narrative the other and nuclear weapons pose an existential threat in the Anthropocene narrative This dual existential change requires a rethinking of politics policy and polity In the social sciences the Anthropocene is being discussed from multidisciplinary perspectives geography political science and peace security and gender studies This is an open access publication

[Science of Human Nature and Art of Sustainable Happiness: Arrive 2 B U](#) Emma-Shivani Brown Ph.D., 2019-09-30 Ultimately people want to be happy For most of us we seek happiness outside of ourselves We hope that our pursuit of a higher paying job a nicer house a new mate a faster speedboat etc will bring happiness These external desires might satisfy our appetite in the short term but when the shiny newness inevitably wears off we find ourselves feeling emotionally bankrupt and often in overwhelming debt We all want to know the secret to happiness even though very few of us actually have the motivation and dedication to work for it Recognizing and changing patterns of behavior that don t serve us adopting positivity practices living mindfully and flourishing often require a substantial life overhaul not just a makeover Here s the secret there is no secret to happiness Much research has been done and countless books classes conferences and programs come out every year each with a new take on this age old enigma

Towards a science of ideas: An inquiry into the emergence, evolution and expansion of ideas and their translation into action Guido Enthoven, Seweryn Rudnicki, Rico Sneller, 2022-08-02 Ideas are the basic building blocks that construct the world we live in Yet despite the abundance of literature on creativity and innovation there has been little reflection on ideas as such their nature and their working mechanisms This book provides foundations for a reflection focused specifically on ideas what they are how they emerge develop interact gain acceptance and become translated into actions In doing so the book moves beyond the mainstream approaches offering new promising theoretical angles presenting original findings and initiating a research agenda for a science of ideas This book provides a fresh perspective on how to conceptualize and study ideas and their working mechanisms by treating ideas as the main object of the study and by bringing together a group of original thinkers scholars and philosophers to move beyond the mainstream academic discourse on creativity and innovation

Toward a More Natural Science Leon R. Kass, 2008-06-30 Kass shows how the promise and the peril of our time are inextricably linked with the promise and the peril of modern science The relation between the pursuit of knowledge and the conduct of life between science and ethics each broadly conceived has in recent years been greatly complicated by developments in the science of life This book examines the ethical questions involved in prenatal screening in vitro fertilization artificial life forms and medical care and discusses the role of human beings in nature

The Science of Human Nature James Fincher Boydston, 1912 **Studies in Human Nature** Sir James Black Baillie, 1921 Finding Answers History! Religion! Science! Pauline Schiappa, 2018-04-28 A mysterious and tremendous thing comes to reveal itself in the course of the lifetime of an earthly human So mysteriously confronted by it the earthly human becomes awed by this compelling human attribute The earthly human becomes so enraptured by it that he begins to consider it as a quality that defines and explains his human nature The earthly human desires to know the earthly human desires to understand that which his physical body sense experiences of earthly reality The earthly human holds so much psychological and intellectual desire toward knowing it that he gives it a name truth How does the earthly human discover truth

Towards a Critical Sociology (Routledge Revivals) Zygmunt Bauman, 2010-02-08 For the better part of its history sociology shared with commonsense its assumption of the nature like character of society and consequently developed as the science of unfreedom In this powerful and engaging work first published in 1976 Professor Bauman outlines the historical roots of such a science and describes how the new trends in sociology emerging from phenomenology and existentialism do not challenge this preoccupation Rather he claims they deepen and extend it by stressing the key role of commonsense particularly the ways in which it is sustained and embedded in the routines and assumptions of everyday life Professor Bauman sets out the form of a critical sociology based on emancipatory reason His main concerns are the validity of commonsense and the truth of a theory which would resolve to transcend the limitations of commonsensical evidence Aimed at human liberation A Critical Sociology is designed to question the very same routines and assumptions of everyday life informed by commonsense

The Medical

Research Novel in English and German, 1900-1950 Phillip A. Scott, 1992 There have been literary portraits of the doctor for hundreds of years but the doctor as the main character of a novel is largely a phenomenon of the 1900s Noting the great popularity of the doctor novel and its contribution to literature Scott characterizes and examines a significant subtype the medical research novel Paper edition unseen 13 95 Annotation copyrighted by Book News Inc Portland OR
