Transparency and Critical Theory Jorge I. Valdovinos, 2022-02-26 This book takes an interdisciplinary approach to the critique of contemporary ideology offering an innovative genealogy of one of its most fundamental discursive manoeuvres the ideological effacement of mediation Providing a comprehensive historical revision of media from the Greeks to the Internet this book identifies several critical junctures at which the tension between visibility and invisibility has overlapped with conceptions of neutrality a tension best incarnated in today's use of the word transparency Then it traces this term's evolving semantic constellation through a variety of intellectual discourses exposing it as a key operator in the revaluation of ideals sensibilities and modalities of perception that lie at the core of our contemporary attention based economy

Transparency Warren Bennis, Daniel Goleman, James O'Toole, 2008-06-09 In *Transparency* the authors a powerhouse trio in the field of leadership look at what conspires against a culture of candor in organizations to create disastrous results and suggest ways that leaders can achieve healthy and honest openness They explore the lightning rod concept of transparency which has fast become the buzzword not only in business and corporate settings but in government and the social sector as well Together Bennis Goleman and O Toole explore why the containment of truth is the dearest held value of far too many organizations and suggest practical ways that organizations their leaders their members and their boards can achieve openness After years of dedicating themselves to research and theory at first separately and now jointly these three leadership giants reveal the multifaceted importance of candor and show what promotes transparency and what hinders it They describe how leaders often stymie the flow of information and the structural impediments that keep information from getting where it needs to go This vital resource is written for any organization business government and nonprofit that must achieve a culture of candor truth and transparency

The Transparency Society Byung-Chul Han, 2015-08-19 Transparency is the order of the day It is a term a slogan that dominates public discourse about corruption and freedom of information Considered crucial to democracy it touches our political and economic lives as well as our private lives Anyone can obtain information about anything Everything and everyone has become transparent unveiled or exposed by the apparatuses that exert a kind of collective control over the post capitalist

world Yet transparency has a dark side that ironically has everything to do with a lack of mystery shadow and nuance Behind the apparent accessibility of knowledge lies the disappearance of privacy homogenization and the collapse of trust The anxiety to accumulate ever more information does not necessarily produce more knowledge or faith Technology creates the illusion of total containment and the constant monitoring of information but what we lack is adequate interpretation of the information In this manifesto Byung Chul Han denounces transparency as a false ideal the strongest and most pernicious of our contemporary mythologies Analysing the Trust-Transparency Nexus Ian Stafford,Alistair Cole,Dominic Heinz,2022-03-24 Is transparency a necessary condition to build and restore citizen and civil society trust in governance and democracy Throughout Europe there is a growing demand for effective forms of citizen engagement and decentralisation in policy making to increase trust and engage increasingly diverse populations This volume addresses the relationship between trust and transparency in the context of multi level governance Drawing on fieldwork from the UK France and Germany this comparative analysis examines different efforts to build trust between key actors involved in decision making at the sub national level It outlines the challenges of delivering this agenda and explores the paradox that trust might require transparency yet in some instances transparency may undermine trust **Transparency in Drug Regulation** Joel Lexchin,2004 One way this relationship is manifested is the But the state does not possess the wherewithal to agreement between the industry and the TPD that undertake the elaborate clinical and pre clinical all of the information that companies submit as trials required to meet the objective of providing part of the regulatory approval process is deemed safe and effective medications Accordingly in November 1996 I made a loaned to the government for purposes of review request through the Access to Information Act for but the companies do so with the expectation that all studies that the Health Protection Branch has the review will produce material gains through that deal with the question of the efficacy of marketing of their products Personal data or usefulness of the data submitted the scientific that enters the files of regulatory agencies like the atmosphere in the agency may be stifled and the TPD can include the identity of individual patients professional growth of its staff severely inhibited This part of the Out of the three proposals that have been put protocol was not followed and the authors made forward the use of SBDs is the most advanced conclusions about subgroups despite the lack of and therefore merits a detailed analysis Canadian Centre for Policy Alternatives VII Is the Summary Basis of Decision Adequate IN EACH OF THE FOUR EXAMPLES the Once a drug has been approved in the United problems would not have been discovered using States the FDA posts on its web site a detailed sum Health Canada s SBDs due to the lack of detailed many of the information that the company has sub information of various types in these Feasibility study for application of digital technologies for improved traceability and transparency along the agrifood value chains Food and Agriculture Organization of the United Nations,2023-09-18 Agrifood value chains of small and medium sized producers in the Near East and North Africa region have the potential to generate more value through improved access to high value markets Limited

logistics capacity in the region coupled with lack of access to continuous cold chain has resulted in weak supply chain management high level of food loss lack of compliance with food quality and safety standards information asymmetries and unfair value distribution affecting income and livelihood of small and medium sized producers Improving traceability and transparency along the agrifood value chains can help building consumers trust by better tracking the origin of food identifying detecting and mitigating the impact of food safety and quality issues in a timely manner and enhancing price visibility and information sharing on value distribution in each stage of the value chain Digital technologies can play an important role in enhancing traceability and transparency by ensuring the collection of comprehensive consistent and reliable data along the supply chain real time tracking easy aggregation integration analysis and sharing of data Despite the recognition of game changing potential few studies have analysed the feasibility of application of these technologies to improve traceability and transparency of value chains from farm gate to market in the region To fill this gap in knowledge this study was conducted to understand the digital landscape in the region examine barriers and incentives for uptake of these technologies and to propose solutions that can improve the adoption rate and sustainability of digital technologies for small and medium sized producers
