

Common Core Mathematics Lesson Plan

Lesson Title: Relating sine and cosine of complementary angles	
Learning Objective(s): Students will be able to explain and use the relationship between the sine and cosine of complementary angles. (G.SRT.7)	Materials: None
Topic Source (page numbers): Common Core Mathematics, Integrated Pathway Mathematics 2, Unit 5 Core publishers)	Key Vocabulary: sine, cosine, right angle, right triangle, complementary angles
Prerequisite / Background Knowledge: Understanding of triangles, angles, and ratios; introduction to sine and cosine.	
Teacher Actions	Student Actions
Introduction (5 minutes): Intro, definition of purpose, demonstrations, etc. - Teacher begins with a review of triangles and of right triangles, pointing out that the angle measures in a triangle add to 180 degrees and that the right angle takes up 90 degrees of that, making the other two angles complementary. Teacher reviews "soh cah toa" and definitions of sine and cosine as ratios of lengths of sides of the right triangle. Teacher then demonstrates how the sine of one angle is equal to the cosine of the other angle in the right triangle.	None
Guided Practice (10 minutes): include questioning tactics, engagement strategies and feedback methods - Teacher uses a triangle to demonstrate an example problem calculating that the sine of 60 degrees is equal to the cosine of 30 degrees. Teacher demonstrates the same equality (sine 60 = cosine 30) using a calculator, writing the values on the board.	Students repeat the example problem using a triangle (soh cah toa) and then, for the following, a calculator, verifying equality: sine 30 = cosine 60 sine 45 = cosine 45 sine 75 = cosine 15
Monitor: checks for understanding / assessments Teacher has students work individually to demonstrate that sine 10 = cosine 80 on a calculator	Students calculate sine of 10 degrees and cosine of 80 degrees.

Teaching and Learning High School Mathematics Charlene E. Beckmann, Denisse R. Thompson, Rheta N. Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i.e. teaching strategies but

they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans
