Toward An Architecture Getty Research Institute:

Toward an Architecture Le Corbusier, 2007 Published in 1923 *Toward an Architecture* had an immediate impact on architects throughout Europe and remains a foundational text for students and professionals Le Corbusier urges readers to cease thinking of architecture as a matter of historical styles and instead open their eyes to the modern world Simultaneously a historian critic and prophet he provocatively juxtaposes views of classical Greece and Renaissance Rome with images of airplanes cars and ocean liners Le Corbusier's slogans such as the house is a machine for living in and philosophy changed how his contemporaries saw the relationship between architecture technology and history This edition includes a new translation of the original text a scholarly introduction and background notes that illuminate the text and illustrations

Towards a Critique of Architecture's Contemporaneity Gevork Hartoonian, 2023-02-14 Pursuing historical analogies between nineteenth century theories and the current practices captivated by digital reproducibility this book offers a critical take on architecture's contemporaneity through four essays tectonics materiality cladding and labor Fundamental to this proposition is the historicity of Gottfried Semper's theorization of architecture amidst the outpouring of new materials and construction techniques during the 1850s Starting with Semper's differentiation between theatricalization and the tectonic of theatricality this book examines thematic essential to architecture's self representation Even though the title of this book recalls the Semperian Four Elements of Architecture its argument encapsulates a unique historico theoretical project probing the tectonic of theatricality beyond Semper The invisible tie between technique and labor is the cord running through the four subjects covered in this book In exploring these subjects from the theoretical standpoint of Marxian dialectics this book's contribution is focused on but not limited to the topicality of labor today when its relationship with capital has been further obscured by the prevailing digitalization of commodity exchange value starting roughly in the 1990s Each essay examines Semper's theorization of architecture in contradistinction to the ways in which technology's mediation has dominated architecture's representation Burrowing through the invisible tie between technique and work asymptomatic of architecture's predicament in global capitalism *Towards a Critique of Architecture's Contemporaneity* advances the scope of architectural criticism beyond the exhausted formalism and architecture's turn to philosophy circa the 1980s and the present tendencies for presentism It will therefore be of interest to researchers and students of architectural history and theory

the unknown ones but the unrecognized ones It s an album of their thoughts and designs This book is a rare possibility for structural engineers to consider the meaning of their profession to meditate about it and its relation to or distinction from the practice of architecture This is a collection of thoughts but not conclusions and theories The book is recommended for all structural and architectural engineers as well as for students of engineering and architecture especially those who have chosen structural engineering as their lifelong profession It is an eye opening book that will provide a clearer more realistic perspective while also offering an idea of where engineers will be in the future and how they should adapt to the time that comes

Architecture Re-assembled Trevor Garnham,2013-04-26 Beginning from the rise of modern history in the eighteenth century this book examines how changing ideas in the discipline of history itself has affected architecture from the beginning of modernity up to the present day It reflects upon history in order to encourage and assist the reader in finding well founded principles for architectural design This is not simply another history of architecture nor a history of histories Setting buildings in their contemporaneous ideas about history it spans from Fischer von Erlach to Venturi and Rossi and beyond to architects working in the fallout from both the Modern Movement Aalto Louis Kahn Aldo van Eyck and Post modernism such as Rafael Moneo and Peter Zumthor It shows how Soane Schinkel and Stirling amongst others made a meaningful use of history and contrasts this with how a misreading of Hegel has led to an abuse of history and an uncritical flight to the future This is not an

armchair history but a lively discussion of our place between past and future that promotes thinking for making *The Architecture of Influence* Amanda Reeser Lawrence, 2023-11-21 How do we create the new from the old *The Architecture of Influence* explores this fundamental question by analyzing a broad swath of twentieth century architectural works including some of the best known examples of the architectural canon modern and postmodern through the lens of influence The book serves as both a critique of the discipline's long standing focus on genius and a celebration of the creative act of revisioning and reimagining the past It argues that all works of architecture not only depend on the past but necessarily alter rewrite and reposition the traditions and ideas to which they refer Organized into seven chapters Replicas Copies Compilations Generalizations Revivals Emulations and Self Repetitions the book redefines influence as an active process through which the past is defined recalled and subsequently redefined within twentieth century architecture **The Language of**
