Toward An Evolutionary Regime For Spectrum Governance Licensing Or Unrestricted Entry:

Toward an Evolutionary Regime for Spectrum Governance William J. Baumol, Dorothy Robyn, 2006-02-03 The federal government's approach to regulating the spectrum remains largely administrative causing major inefficiency and waste Ironically just as the FCC has begun to use market mechanisms some people are pushing to treat spectrum as a common resource open to all entrants Commons proponents maintain that with new interference avoiding technology licensing is becoming unnecessary and impractical In this brief study noted economist William J Baumol evaluates two options for spectrum governance a tradable license market approach and a commons approach He compares the practicality of each in terms of six key issues interference adequacy of investment in innovation monopoly power preservation of diversity service to rural areas and the tension between vested interests and the need for adaptable arrangements Baumol demonstrates that while neither approach is ideal a commons regime has severe shortcomings Above all he emphasizes the importance of impermanence in the granting of licenses to preserve the flexibility to adapt to unforeseen technological and other developments

Toward an Evolutionary Regime for Spectrum Governance William J. Baumol, 2006 Evaluates two options for spectrum governance a tradable license approach and a commons approach in terms of interference investment in innovation monopoly power diversity rural service and vested interests versus adaptability Provided by publisher *The Political Spectrum* Thomas Winslow Hazlett, 2017-05-23 From the former chief economist of the FCC a remarkable history of the U S government's regulation of the airwaves Popular legend has it that before the Federal Radio Commission was established in 1927 the radio spectrum was in chaos with broadcasting stations blasting powerful signals to drown out rivals In this fascinating and entertaining history Thomas Winslow Hazlett a distinguished scholar in law and economics debunks the idea that the U S government stepped in to impose necessary order Instead regulators blocked competition at the behest of incumbent interests and for nearly a century have suppressed innovation while quashing out of the mainstream viewpoints Hazlett details how spectrum officials produced a vast wasteland that they publicly criticized but privately protected The story twists and turns as farsighted visionaries and the march of science rise to challenge the old regime Over decades reforms to liberate the radio spectrum have generated explosive progress ushering in the smartphone revolution ubiquitous social media and the amazing wireless world now emerging Still the author argues the battle is not even half won
