Toward a Theory of Spacepower Institute for National Strategic Studies, Institute for National Strategic Studies National Defense University, 2014-04-21 Chapters 15 through 30 Vol 2 Over a century ago the rapid expansion of global overseas trade brought about by the advent of improved steam propulsion and advances in ship design and construction posed new national policy and security questions for the United States First to what degree did American economic prosperity depend upon being a major active participant in maritime commerce Second what were the naval implications of such action with respect to the extension and defense of important if not vital American interests Third what role should the U S Government play in the promotion of maritime commercial activity and the creation of the naval forces required to protect American overseas trade And fourth what changes if any were required with respect to the direction of American foreign policy In 1890 Captain Alfred Thayer Mahan a serving officer in the U S Navy published *The Influence of Sea Power upon History 1660 1783* This book provided a comprehensive statement about maritime commerce naval power government policy and international politics

that became the theoretical point of departure for almost all discussion of what was widely regarded to be the most important national security problem of the day both in the United States and around the world Today the importance of space as a venue for economic and military activity in certain respects resembles the conditions of maritime commerce and naval power in the late 19th century These circumstances prompt two questions first is a history based exploration of prospects and possibilities of spacepower in the manner of Mahan a viable intellectual proposition Second does his work contain ideas that are applicable to spacepower or at least suggest potentially productive lines of inquiry Addressing these issues however requires a sound foundation namely an accurate understanding of Mahan s major arguments and his manner of reasoning Unfortunately misunderstanding Mahan is the rule rather than the exception His writing is rarely read and the bulk of the critical literature is corrupted by serious interpretive error What follows is a schematic representation of Mahanian argument that can be related to the consideration of the nature of the theoretical problem of space power **Toward a Theory of**

Al-Rodhan,2012-05-11 Al Rodhan sheds new light on the debate about

the geopolitics of outer space going beyond applying traditional International Relations approaches to space power and security by introducing a multidimensional spatial framework The meta geopolitics framework includes space and expands classical power considerations to cover seven state capacities **Power, State and Space** Marco Aliberti,Ottorino Cappelli,Rodrigo Praino,2023-07-18 This book explains on what basis a nation can claim the status of space power what are the criteria differentiating a space power from lesser space actors and how their spacepower can be empirically measured and assessed To this end it sets forth a comprehensive multidisciplinary framework to enable a dynamic comparison of space actors and of the pathways that lead them in and out of the space powers club Drawing upon a critical review of the existing literature it conceptualises spacepower as a form of state power based on the complex interplay between the two defining dimensions of stateness namely the well studied dimension of capacity and the often neglected yet exceedingly important dimension of autonomy The book demonstrates that only actors possessing high levels of both autonomy and capacity qualify

as space powers Different levels of either capacity or autonomy produce other types of space actors including skilled spacefarers self reliant spacefarers primed spacefarers and emerging space actors This innovative conceptual framework is complemented by an in depth comparative assessment that collects and processes a large amount of hard to find data on the most active global space actors and aggregates multiple indicators into a compound non hierarchical index of space power visualised in the form of a matrix
