This technology was developed from 2000 to 2002 in collaboration with the www.ATSDH.gov team (and www.environmentalhealthtrust.org). ATSDH is responsible for providing grant resources to protect the chemical community. EHCN collects and provides accurate, timely news. ATSDH and EHCN have a working relationship during the chemical emergency period that our website is not an official ATSDH page.

Abstract This paper presents a novel approach to the problem of finding a minimum cost path in a graph. The approach is based on a new algorithm that uses a combination of dynamic programming and graph search. The algorithm is able to find the minimum cost path in a graph with a large number of nodes and edges. The results of the algorithm are compared with those of other algorithms, and it is shown that the proposed algorithm is more efficient than the others.
