Tokyo A Spatial Anthropology:

Tokyo Hidenobu Jinnai, 1995 The sheer physical extent of Tokyo its mile upon mile of high density and mostly low rise development seemingly without topographic or maritime memory makes it a difficult city for many Westerners to understand We suspect that the same may be so for many Japanese Jinnai Hidenobu shows us how today s Tokyo is rooted in its early development and how today s streets waterways land uses and building types come from a past that remains visible to those who would care to look One needs to walk or to row with Jinnai to see how yesterday makes today His is a work of love that ties generations together in their physical environment Allan B Jacobs author of *Great Streets* Topographies of Japanese Modernism Seiji M. Lippit, 2002 What happens when a critique of modernity a revolt against the traditions of the Western world is situated within a non European context where the concept of the modern has been inevitably tied to the image of the West Seiji M Lippit offers the first comprehensive study in English of Japanese modernist fiction of the 1920s and 1930s Through close readings of four leading figures of this movement Akutagawa Yokomitsu Kawabata and Hayashi Lippit aims to establish a theoretical and historical framework for the analysis of Japanese modernism The 1920s and 1930s witnessed a general sense of crisis surrounding the institution of literature marked by both the radical politicization of literary practice and the explosion of new forms of cultural production represented by mass culture Against this backdrop this study traces the heterogeneous literary topographies of modernist writings Through an engagement with questions of representation subjectivity and ideology it situates the disintegration of literary form in these texts within the writers exploration of the fluid borderlines of Japanese modernity **Tokyo** Evelyn Schulz, Barbara E. Function-Based Spatiality and the Development of Korean Communities in Japan David Rands,2014-05-21 Function Based Spatiality and the Development of Korean Communities in Japan utilizes the theoretical model of complex adaptive systems and introduces the concept of function based spatiality to investigate the roles of the urban environments of Tokyo and Osaka in the development of Korean communities in Japan Analysis of distinct Korean communities allows for the examination of urban factors of each city which contributed to the patterns of Korean immigration and community formation By utilizing a comparative narrative of the two cities distinctions between the organic growth of Osaka and the planned city of Tokyo are illuminated Additionally the discussion utilizes the concept of function based spatiality to show how each city interacted with its surrounding regional national and global spheres The functions of Tokyo as a gateway to Western modernization and center of the Japanese state shaped the interactions with Korean immigrants Likewise Osaka s functions as a center of mercantilism and second city played a large role in how Koreans were incorporated into the urban ethnoscares Taken together these two examples provide insight to the dynamics of urban systems on the development of immigrant communities

The Resilient City Lawrence J. Vale,Thomas J. Campanella,2005-01-20 In 1871 the city of Chicago was almost entirely destroyed by what became known as The Great Fire Thirty five years later San Francisco lay in smoldering ruins after the catastrophic earthquake of 1906 Or consider the case of the Jerusalem the greatest site of physical destruction and renewal in history which over three millennia has suffered wars earthquakes fires twenty sieges eighteen reconstructions and at least eleven transitions from one religious faith to another Yet this ancient city has regenerated itself time and again and still endures Throughout history cities have been sacked burned torched bombed flooded besieged and leveled And yet they almost always rise from the ashes to rebuild Viewing a wide array of urban disasters in global historical perspective The Resilient City traces the aftermath of such cataclysms as the British invasion of Washington in 1814 the devastation wrought on Berlin Warsaw and Tokyo during World War II the late 20th century earthquakes that shattered Mexico City and the Chinese city of Tangshan Los Angeles after the 1992 riots the Oklahoma City bombing the destruction of the World Trade Center Revealing how traumatized city dwellers consistently develop narratives of resilience and how the pragmatic process of urban recovery is always fueled by highly symbolic actions The Resilient City offers a deeply informative and unsentimental tribute to the dogged persistence of the

city and indeed of the human spirit Japan in Print Mary Elizabeth Berry, 2006-02-16 A quiet revolution in knowledge separated the early modern period in Japan from all previous time After 1600 self appointed investigators used the model of the land and cartographic surveys of the newly unified state to observe and order subjects such as agronomy medicine gastronomy commerce travel and entertainment They subsequently circulated their findings through a variety of commercially printed texts maps gazetteers family encyclopedias urban directories travel guides official personnel rosters and instruction manuals for everything from farming to lovemaking In this original and gracefully written book Mary Elizabeth Berry considers the social processes that drove the information explosion of the 1600s Inviting readers to examine the contours and meanings of this transformation Berry provides a fascinating account of the conversion of the public from an object of state surveillance into a subject of self knowledge Japan in Print shows how as investigators collected and disseminated richly diverse data they came to presume in their audience a standard of cultural literacy that changed anonymous consumers into an us bound by common frames of reference This shared space of knowledge made society visible to itself and in the process subverted notions of status hierarchy Berry demonstrates that the new public texts projected a national collectivity characterized by universal access to markets mobility sociability and self fashioning **The Making of Modern Japan** Marius B.
